Mortality's Muse D. T. Siebert,2013-10-10 The inevitability of death that of others and our own is surely among our greatest anxieties Mortality's Muse The Fine Art of Dying explores how art mainly literary art addresses that troubling reality While religion and philosophy offer important consolations for life's end art responds in ways that are perhaps more complete and certainly more deeply human Among subjects treated the ars moriendi or art of dying tradition the contrast between past and more recent cultural values the religious consolation's value but shortcoming for some people the role of art in offering a secular consolation dying as a performing art the philosophic ideal of good death the lively appeal of carpe diem or living for the present moment the elegiac sense of life and the two opposite parts Mortality's Muse has played in dealing with war the most senseless and unnecessary cause of death The idea of an aesthetic sense of life forms the basis of these discussions Human beings are makers in the largest sense of the word and art represents everything they make civilization itself with all its greatness and failings Our civilization may ultimately be nothing but an evanescent blip in the cosmos Even so the creation of beauty meaning and purpose from disorder and suffering defines us as human beings In the words of Robinson Jeffers even if monuments eventually crumble and all art perish yet for thousands of years carved stones have stood and pained thoughts found the honey of peace in old poems

The God Debaters Adrian Rosenfeldt,2022-05-04 This book examines the post 9 11 God debate in the West Through a close study of prominent English God debaters Richard Dawkins Karen Armstrong Christopher Hitchens and Terry Eagleton Adrian Rosenfeldt demonstrates that New Atheist and religious apologist ideas and arguments about God science and identity are driven by mythic autobiographical narratives and Protestant or Catholic cultural heritage This study is informed by criticism of the New Atheist polemic as being positivistic and the religious apologists as propagating sophisticated theology In both cases the God debaters are perceived as disassociating themselves from human lived experience It is through reconnecting the God debaters intellectual ideas to their cultural and social background that the God debate can be grounded in a recognisable human reality that eludes reductive distinctions and disembodied abstractions

tremendous advantages over other species throughout our evolution. However, this capability comes with a curse. By five to ten years of age, all humans know where they are heading to the grave. In *Mortals*, Rachel Menzies and Ross Menzies, both acclaimed psychologists whose life's work has focused on death anxiety, examine all the major human responses to death across history. From the development of religious systems denying the finality of death to immortality projects involving enduring art, architecture, and literature, some of the consequences of our fear of death have been glorious, while others have been destructive, leading to global conflicts and genocide. Looking forward, *Mortals* hypothesizes that worse could be to come: our unconscious dread of death has led to rampant consumerism and overpopulation, driving the global warming and pandemic crises that now threaten our very existence. In a terrible irony, *Homo sapiens* may ultimately be destroyed by our knowledge of our own mortality. A fascinating tour of our species' attempts across millennia to come to terms with mortality, *Mortals* offers a stunning glimpse into what our fear of death means for our future. A must read.
