Paulo Davim, 2025-12-29 With the rapid advancement in micro and nano scale composite technologies, there is an increasing need to understand their mechanical, thermal and structural behavior to design the next generation of materials for aerospace, automotive, biomedical and industrial applications. The book is organized into twelve chapters, each focusing on specific innovations and methods in micro and nano composites. It begins with an introductory chapter on the basic concepts of micro and nano composites, setting the stage for more complex evaluations in later chapters. Then it delves into the mechanical and thermal properties of composites enhanced by graphene nanoparticles and explores hybrid composites using natural fibers like crab shell and jute. The advancement of 3D printed composites, specifically carbon fiber reinforced PLA, is covered using the Taguchi method. Subsequent chapters investigate the development of biocomposite materials using hemp, kenaf and nut shell powders alongside studies on metal matrix composites, wear characteristics and surface engineering using micro powders and nanoparticles. Key topics like friction, stir processing and the integration of micro metal particles in additive manufacturing provide insights into both fabrication techniques and material behavior. The book also features research on hybrid composites such as titanium, molybdenum and vanadium for agricultural applications and magnesium based materials reinforced with

nanoparticles for biomedical uses *Advances in Machine Learning and Big Data Analytics II* Ashokkumar Patel, Nishtha Kesswani, Bosubabu Sambana, 2025-09-26 In the dynamic landscape of technology machine learning and big data analytics have emerged as transformative forces reshaping industries and empowering innovation Machine learning a subset of artificial intelligence equips systems to learn and adapt from data revolutionizing decision making automation and predictive capabilities Meanwhile Big Data Analytics processes and extracts insights from vast and complex datasets unveiling hidden patterns and trends Together these fields enable us to harness the immense power of data for smarter business strategies improved healthcare enhanced user experiences and countless other applications This edited volume on machine learning and big data analytics Proceedings of ICMLBDA 2023 which was held on May 29 30 2023 by NERIST and NIT Arunachal Pradesh India introduces an exciting journey into the intersection of machine learning and Big Data Analytics where data becomes a catalyst for progress and transformation Big data management in Sensing Renny Fernandez, Terrance Frederick Fernandez, 2022-09-01 The book is centrally focused on human computer Interaction and how sensors within small and wide groups of Nano robots employ Deep Learning for applications in industry It covers a wide array of topics that are useful for researchers and students to gain knowledge about AI and sensors in nanobots Furthermore the book explores Deep Learning approaches to enhance the accuracy of AI systems applied in medical robotics for surgical techniques Secondly we plan to explore bio nano robotics which is a field in nano robotics that deals with automatic intelligence handling self assembly and replication information processing and programmability *Human Factors in Computing Systems* ,1995
