Who Cares about Maths anyway? Dr. Majeda Awawdeh, 2019-06-02
In *Who Cares about Maths Anyway*, Majeda Awawdeh, PhD, addresses the top issues with Australia's current education system in her honest, analytical overview. Over the course of the book, teachers, students, and parents are given the opportunity to explore the deep-seated problems of their current school system, including a lack of teacher training and development, one-size-fits-all curricula, and unfocused government funding. Along with this insightful analysis, Dr. Awawdeh introduces a long-term vision that can improve the system for all involved, resulting in the progression of student success and higher ranking worldwide. Individuals looking for in-depth research in the area of the Australian education system will find her book a valuable resource in their quest to solve the problems today's students face.

New Words, New Meanings: Supporting the Vocabulary Transition from Primary to Secondary School Alice Deignan, Marcus Jones, 2024-12-05
When pupils move from primary to secondary school and start to study subjects in a more specialist way, they have to learn new and unfamiliar disciplinary languages in each of the numerous subjects in their timetable. These new languages include new ways of presenting ideas and hundreds, even thousands, of new words, as well as new meanings of words they think they already know. Based on a major research project, this book explains the nature of the language challenge students face in early secondary school and shows teachers how they can make the language of their subject less daunting and more accessible for all students. Chapters explore the language of the classroom at Key Stage 2 and Key Stage 3 using written and spoken language data from everyday classrooms. Including subject-specific word lists and contextual examples for English, maths, science, history, and geography, chapters cover how language use is shaped by topic, context, relationships, and purpose. The language features of early secondary school. Key principles for selecting vocabulary to

teach Supporting pupils with disciplinary grammar and style Ensuring a whole school approach to language issues Full of practical tips to make the language of curriculums less daunting and more accessible for all students making the transition from primary to secondary school this book will be valuable reading for teachers educational support staff and school leaders working with children in late primary and early secondary school Essential Mathematics for the Australian Curriculum Year 8 David Greenwood, Bryn Humberstone, Justin Robinson, Jenny Goodman, Jenny Vaughan, Franca Frank, 2011-02-04 Essential Mathematics for the Australian Curriculum provides an authoritative and practical interpretation of all content strands substrands and content descriptions Helping Children Learn Mathematics Robert Reys, Mary Lindquist, Diana V.
