New Initiatives in the Malaysian Capital Market Hon Wei Leow, Wee Yeap Lau, 2024-04-29 This book covers the most recent initiatives in the Malaysian capital market. In doing so, it discusses the Leading Entrepreneur Accelerator Platform Market LEAP Market and Special Purpose Acquisition Company SPAC. With regard to the LEAP Market, the book elaborates on its inception, value proposition, governance, performance issues, and strengths. It also compares LEAP Market with the Main and ACE Markets and draws the experience of the Korea New Exchange KONEX for LEAP Market to emulate and improve its operation, showing how KONEX provides valuable lessons for Malaysia's LEAP Market as the former has two times more listed firms than the latter. Similarly, the book also includes discussions on the inception of SPAC, its features, volumes, risk issues, strength, life cycle, and time frame of SPAC IPO and includes case studies of the four firms listed under SPAC IPO. Put together, the book offers a compilation of facts, analysis, and insights from these new market initiatives and provides a reference for the financial market industry, regulators, market practitioners, analysts, researchers, government authorities, and universities.

Green Energy to Sustainability: Strategies for Global Industries Alain A. Vertes, Nasib Qureshi, Hans P. Blaschek, Hideaki Yukawa, 2020-03-25 Reviews the latest advances in biofuel manufacturing technologies and discusses the deployment of other renewable energy for transportation. Aimed at providing an interface useful to business and scientific managers, this book focuses on the key challenges that still impede the realization of the billion-ton renewable fuels vision. It places great emphasis on a global view of the topic, reviewing deployment and green energy technology in different countries across Africa, Asia, South America, the EU, and the USA. It also integrates scientific, technological, and business development perspectives to highlight the key developments that are necessary for the global replacement of fossil fuels with green energy solutions. Green Energy to Sustainability: Strategies for Global Industries examines the most recent developments in biofuel manufacturing technologies in light of business, financial, value chain, and supply chain concerns. It also covers the use of other renewable energy sources like solar energy for transportation and proposes a view of the challenges over the next two to five decades and how these will deeply modify the industrial world in the third millennium. The coming of age of electric vehicles is also looked at, as is the impact of their deployment on the biomass-to-biofuels value chain. Offers extensive updates on the field of green energy for global industries. Covers the structure of the energy business, chemicals, and diesel from biomass, ethanol, and butanol, hydrogen, and methane, and more. Provides an expanded focus on the next generation of energy technologies. Reviews the latest advances in biofuel manufacturing technologies. Integrates scientific, technological, and business perspectives. Highlights important developments needed for replacing fossil fuels with green energy. Green Energy to Sustainability: Strategies for Global Industries will appeal to academic researchers working on the production of fuels from renewable feedstocks and those working in green and sustainable chemistry and chemical process engineering. It is also an excellent textbook for courses in bioprocessing technology, renewable resources, green energy, and sustainable
