Emerging Materials for Energy Conversion and Storage Kuan Yew Cheong, Giuliana Impellizzeri, Mariana Amorim Fraga, 2018-08-09
Emerging Materials for Energy Conversion and Storage presents the state of art of emerging materials for energy conversion technologies solar cells and fuel cells and energy storage technologies batteries supercapacitors and hydrogen storage. The book is organized into five primary sections each with three chapters authored by worldwide experts in the fields of materials science physics chemistry and engineering. It covers the fundamentals functionalities challenges and prospects of different classes of emerging materials such as wide bandgap semiconductors oxides carbon based nanostructures advanced ceramics chalcogenide nanostructures and flexible organic electronics nanomaterials. The book is an important reference for students and researchers from academics but also industry interested in understanding the properties of emerging materials. Explores the fundamentals challenges and prospects for the application of emerging materials in the development of energy conversion and storage devices. Presents a discussion of solar cell and photovoltaic fuel cell battery electrode supercapacitor and hydrogen storage applications. Includes notable examples of energy devices based on emerging materials to illustrate recent advances in this field.

Computational Systems Bioinformatics Peter Markstein, Ying Xu, Life Sciences Society, 2007
This volume contains about 40 papers covering many of the latest developments in the fast growing field of bioinformatics. The contributions span a wide range of topics including computational genomics and genetics protein function and computational proteomics the transcriptome structural bioinformatics microarray data analysis motif identification biological pathways and systems and biomedical applications. Abstracts from the keynote addresses and invited talks are also included. The papers not only cover theoretical aspects of bioinformatics but also delve into the application of new methods with input from computation engineering and biology disciplines. This multidisciplinary approach to bioinformatics gives these proceedings a unique viewpoint of the field.
