

CRM Case Studies

What are CRM case studies?

CRM case studies are success stories of companies operating in various industries depicting how they went about selecting the right CRM software system to address challenges with their customer service, marketing, and sales activities.

What's included in CRM case studies?

All CRM case studies tell the story of an organization that was experiencing numerous challenges with nurturing their client relationships, how they pinpointed the right CRM system to streamline their processes, and the results of that CRM selection project.

What are the business benefits of CRM case studies?

Many companies have little experience with selecting software like CRM. CRM case studies are tools that companies can use to get a glimpse of how other companies approached their search for the right CRM system—defining the scope of the selection project, shortlisting candidates, making the final decision, negotiating with the vendor, and even implementing the new system.

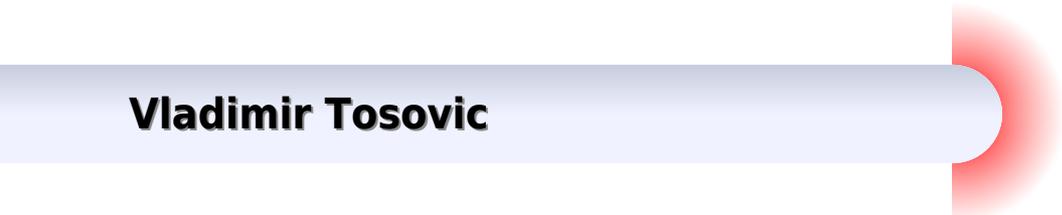

How Can TEC's CRM case studies help you?

TEC's CRM case studies show how TEC provided expert guidance to help companies like yours, including manufacturers, define and match their requirements to the right CRM system and negotiate with vendors to secure the best CRM software deal.

Strategic use of CRM Vladimir Tosovic, 2001-09-26 Inhaltsangabe Abstract CRM is a buzzword nowadays. This catchphrase has become the revenue driver for the consultants and a nightmare for the people responsible for its implementation. Although this topic receives broad media attention, the presented strategic CRM issues are very fuzzy. Attracted by the enormous revenue potential, there is a vast number of CRM experts giving tips on the CRM strategies, which results in a very unclear and even contrary coverage of this subject. The companies feel that they need CRM, but as soon as they try to find out what that is and how it could be beneficial for their business, they get very diverse and vague answers. This work will seek to provide a consistent picture of CRM strategy and the underlying technology. The focus of this paper is to offer a critical analysis of different strategic CRM concepts and integrate them into one CRM framework. As CRM is made possible by the technology developments, the understanding of opportunities provided by the underlying technology is necessary. Therefore, the center of attention will be in the explanation of the interaction between the customer oriented strategy and the enabling technology. In order to uncover the essence of CRM, this paper will provide a look at the roots of CRM. It will explain the theoretical background of CRM and the new market challenges which have been pushing the development of the CRM concept. Also, the relationship between the customer satisfaction and the customer profitability must be evaluated as satisfied customers is one of the main intentions of CRM. I want also to approach some practical issues of CRM. This study will seek to outline the findings about the bottom line impact of CRM and the issues on the accessibility of the customer information. Finally, with the last chapter, I will try to close with useful recommendations regarding CRM strategy development and provide a conclusion on the results achieved in this work.
