Central Issues in Jurisprudence Nigel E. Simmonds, 2013 La 4e de couverture indique Central Issues in Jurisprudence is a clear introduction to the major theories and arguments which currently dominate discussion in jurisprudence The work enables readers to read the original writers with a real understanding of how the theories relate to each other and how these theories cluster around certain fundamental issues Combining lucid exposition with commentary the author provides a penetrating analysis of each theory examined and a deep understanding of the problems addressed

Central Issues in Jurisprudence Nigel E. Simmonds, 1986 Concerning itself with the nature of law and legal reasoning and with the concepts of justice and individual rights jurisprudence seeks to set legal ideas in the wider context of moral and political theory To study jurisprudence properly you need to read books by such authors as Rawls Nozick Hart and Dworkin It is not or should not be a matter of ploughing through a textbook that merely tells you about these books Nevertheless a student needs some preliminary orientation This book aims to provide a brief guide to the major theories and arguments which dominate discussion in jurisprudence The object is to put the student as quickly as possible into a position where he or she can read the original writers with a real understanding of how their theories relate to each other and of how these theories cluster around certain recurring fundamental issues

A Dialogical Concept of Minority Rights Hanna H. Wei, 2016-04-26 In A Dialogical Concept of Minority Rights Hanna H Wei demonstrates that a more plausible and realistic concept of minority rights should consist of not only rights against the state but also rights against the group She formulates and defends three separate but related rights to dialogue and thoroughly analyses how they may operate not only to maintain a healthy balance between the minorities need to be culturally distinct and their need to relate to and belong in the larger society but also that they address the generalisations and presuppositions on which the debate of multiculturalism has been based and constitute the first step of a possible solution to many of the theoretical and practical difficulties of minority protection

Human Rights and Charity Law Kerry O'Halloran, 2016-03-10 The 60 or so nations that subscribe to the common law tradition had for centuries broadly accepted the same legal definitions

of what constitutes a charity In recent years however a number of countries have embarked on charity law reform processes designed to strengthen the regulatory framework and to review and encode common law concepts A primary driver of reform was the need to modernise national charity law and ensure human rights compatibility In light of these reforms this book takes stock of how charity law is adapting to face the challenges presented by human rights The book identifies the key areas where human rights and charity law intersect and examines the importance of those areas the principles involved and their political significance It offers a comparative analysis of selected common law countries including England Wales Ireland US Canada Australia and New Zealand assessing the extent of national human rights and charity compatibility Kerry O Halloran also goes on to consider tensions arising from the intersection of human rights and charity law including the significance of cultural values and heritage the importance of proportionality and striking a balance between public and private interests in current society

Property Rights: A Re-Examination J. E Penner,2020-02-14 Ranging over a host of issues Property Rights A Re Examination pinpoints and addresses a number of theoretical problems at the heart of property theory Part 1 reconsiders and rejects once again the bundle of rights picture of property and the related nominalist theories of property showing that ownership reflects a tripartite structure of title the right to immediate exclusive possession the power to license what would otherwise be a trespass and the power to transfer ownership Part 2 explores in detail the Hohfeldian theory of jural relations in particular liberties and powers and Hohfeld s concept of multital jural relations and shows that this theory fails to illuminate the nature of property rights and indeed obscures much that it is vital to understand about them Part 3 considers the form and justification of property rights beginning with the relation an owner s liberty to use her property and her right to exclude with particular reference to the tort of nuisance Next up for consideration is the Kantian theory of property rights the deficiencies of which lead us to understand that the only natural right to things is a form of use or usufructory right Part 3 concludes by addressing the ever vexed question of property rights in land

Distributive Justice and World Trade Law Oisin Suttle,2017-10-12 What does justice demand in international trade regulation And how far does World Trade Organization WTO law respond to those demands Whether our focus is developing countries struggling industries or environmental protection distributive conflict is a pervasive feature of international economic law Despite this we lack an adequate theory of distributive justice for this domain Drawing on philosophical approaches to global justice this book advances a novel theory of justice in trade regulation and applies this to explain and critique the law of the WTO Integrating theoretical and doctrinal approaches it demonstrates the potential for political theory to illuminate and inform the progressive development of WTO law including rules on border measures discrimination trade remedies and domestic regulation Written from an interdisciplinary perspective accessible to lawyers philosophers and political scientists the book will appeal both to theorists interested in building bridges from theory to practice and practitioners seeking new perspectives on existing problems
