have their byproducts chemical contamination from fertilizers and pesticides diesel emissions oil spills a vast plastic continent found floating in the ocean The Contamination of the Earth offers a social and political history of industrial pollution mapping its trajectories over three centuries from the toxic wastes of early tanneries to the fossil fuel energy regime of the twentieth century [Radical Reform](#) Tariq Ramadan,2009-02-05 In this new book Tariq Ramadan argues that it is crucial to find theoretical and practical solutions that will enable Western Muslims to remain faithful to Islamic ethics while fully living within their societies and their time He notes that Muslim scholars often refer to the notion of ijthad critical and renewed reading of the foundational texts as the only way for Muslims to take up these modern challenges But Ramadan argues in practice such readings have effectively reached the limits of their ability to serve the faithful in the West as well as the East In this book he sets forward a radical new concept of ijthad which puts context including the knowledge derived from the hard and human sciences cultures and their geographic and historical contingencies on an equal footing with the scriptures as a source of Islamic law

The Monsanto Papers Gilles-Éric Seralini,Jérôme Douzelet,2021-11-16 A David and Goliath battle for truth A specialist in GM foods and pesticides the biologist Gilles ric Seralini has studied their toxicity and effects on people s health for many years In September 2012 for the first time in a major scientific journal Food and Chemical Toxicology he published a study showing the effect on the liver and kidneys of two of Monsanto s flagship products Roundup weedkiller and the GM foods created to absorb it Images from the study of tumor ridden rats fed with GM foods and Roundup went viral The study was a PR disaster for Monsanto The multinational soon bounced back and did everything in its power to cover up the study leaning on the publishers to retract the findings Monsanto began a series of smear campaigns to discredit Seralini and fellow researchers and intimidate their supporters while pumping out their own collection of fake research findings and testimonies These practices were met with huge suspicion but there was no concrete evidence until in 2017 Monsanto was ordered to publish tens of thousands of confidential documents in a class action lawsuit presented by thousands of individuals afflicted with serious illnesses from their use of Roundup The Monsanto Papers that were produced subsequently proved the company s cynical attempts at a cover up as well as its fraudulent practices Gilles ric Seralini and Jérôme Douzelet delved into the documents and discovered how in the pursuit of its own short term economic interests Monsanto used sophisticated methods of deceit to bypass legislation devised to protect millions of people Seralini and Douzelet discovered how Monsanto managed to provide phony assessments to conceal the poisons its products contain thus deceiving the public authorities and the scientific and medical communities

[Cognitive Prosthethics](#) Maxime Derian,2018-11-22 Computerized machines can be found in many forms and all around us in our pockets and even sometimes in our body For many of us they are now essential elements of everyday life When it comes to smartphones connected objects medical digital devices and e health these digital tools have proliferated in our environment continually transforming our modes of social organization They act as prostheses and orthotics that enhance our cognitive capacities and influence our inherent behaviors

Are digital tools that perpetually envelop the body and the spirit able to overwhelm the social order? Could our cognitive prosthetics lead to permanent radical change to our society which could become similar to a hive? This book explores this reflection which is at the center of social research on digital tools. Presents a complete review of the field of computerized human prosthetics. Drawn from research conducted over 6 years and from 2 post doctoral surveys conducted at renowned institutions in France and Japan: Sorbonne University, CNRS, Tokyo Institute of Technology. L'arme alimentaire Christian Pès, 2007. En France, l'agriculture coïncide entre les ultralibéraux qui prouvent la suppression des aides et les altermondialistes partisans d'une vision aussi bucolique que régressive. Est en train de disparaître peu à peu. Nous risquons donc de ne plus pouvoir subvenir à nos besoins. Qu'elle soit alimentaire ou énergétique, cette perte d'autonomie porte un nom de pendance. Mais qu'est-ce alors qu'un pays qui ne peut plus nourrir ses habitants et leur garantir la sécurité alimentaire? L'alimentation est une arme. Les Américains ne l'ont jamais oubliée, c'est pourquoi ils ont toujours protégé leur agriculture. Choqué par cette situation et par les risques qui en découlent, Christian Pès a décidé d'écrire ce livre passionné qui mêle argumentation implacable, colère et conviction. Il démontre que l'agriculture peut devenir un des grands moteurs de notre économie. Au moment où se posent deux questions fondamentales: comment nourrir la planète et comment satisfaire les besoins énergétiques? Christian Pès propose une voie alternative s'appuyant sur une agriculture d'avenir respectueuse de l'environnement. Notre pays est l'une des premières puissances agricoles mondiales. Nous avons toutes les cartes en main pour qu'elle le reste et pour ne pas devenir des pantins assujettis au bon vouloir de ceux qui les nourrissent.

Les mondes agricoles en politique Bertrand Hervieu, 2010. Des chercheurs analysent les transformations de la profession d'agriculteur en France qui semble de plus en plus difficile à cerner. Ils interrogent les nouveaux enjeux du monde rural, la représentation de cette catégorie professionnelle dans les débats locaux et internationaux et de façon plus générale, la place de l'agriculture dans la construction européenne et la mondialisation.
