Faculty Directory, 1995 **Prentice Hall's Federal Taxation 1998** John L. Kramer, Thomas R. Pope, 1997 Design of Prestressed Concrete to AS3600-2009 Raymond Ian Gilbert, Neil Colin Mickleborough, Gianluca Ranzi, 2016-02-17 The design of structures in general and prestressed concrete structures in particular requires considerably more information than is contained in building codes A sound understanding of structural behaviour at all stages of loading is essential This textbook presents a detailed description and explanation of the behaviour of prestressed concrete members and structures both at service loads and at ultimate loads and in doing so provides a comprehensive and up to date guide to structural design Much of the text is based on first principles and relies only on the principles of mechanics and the properties of concrete and steel with numerous worked examples However where the design requirements are code specific this book refers to the provisions of the Australian Standard for Concrete Structures AS3600 2009 and where possible the notation is the same as in AS3600 2009 A parallel volume is written to Eurocode 2 the European Standard for the Design of Concrete Structures The text runs from an introduction to the fundamentals to in depth treatments of more advanced topics in modern prestressed concrete structures It suits senior undergraduate and graduate students and also practising engineers who want a comprehensive guide to the design of prestressed concrete structures It retains the clear and concise explanations and the easy to read style of the first edition but the content has been extensively reorganised and considerably expanded and updated New chapters cover design procedures actions and loads prestressing systems and construction requirements and connections and detailing The topic of serviceability is developed extensively throughout The authors have been researching and teaching the behaviour and design of prestressed concrete structures for more than 35 years and this updated edition of the book reflects this wealth of experience The work has also gained much from Ian Gilbert's active and long time involvement in the development of the Australian Standards for Concrete Structures AS3600 2009 and Concrete Bridges AS5100 5 2012
