International Trade and Climate Change World Bank, 2007-10-15 Climate change remains a global challenge requiring international collaborative action Another area where countries have successfully committed to a long term multilateral resolution is the liberalization of international trade Integration into the world economy has proven a powerful means for countries to promote economic growth development and poverty reduction The broad objectives of the betterment of current and future human welfare are shared by both global trade and climate regimes Yet both climate and trade agendas have evolved largely independently through the years despite their mutually supporting objectives Since global emission goals and global trade objectives are shared policy objectives of most countries and nearly all of the World Bank's clients it makes sense to consider the two sets of objectives together This book is one of the first comprehensive attempts to look at the synergies between climate change and trade objectives from economic legal and institutional perspectives It addresses an important policy question how changes in trade policies and international cooperation on trade policies can help address global environmental spillovers especially GHG emissions and what the potential effects of national environmental policies that are aimed at global environmental problems might be for trade and investment It explores opportunities for aligning development and energy policies in such a way that they could stimulate production trade and investment in cleaner technology options

World Economic Outlook, April 2019 International Monetary Fund. Research Dept., 2019-04-09 After strong growth in 2017 and early 2018 global economic activity slowed notably in the second half of last year reflecting a confluence of factors affecting major economies China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards investment dropped in Italy as sovereign spreads widened and external demand especially from emerging Asia softened Elsewhere natural disasters hurt activity in Japan Trade tensions increasingly took a toll on business confidence and so financial market sentiment worsened with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year weighing

on global demand Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US China trade deal but they remain slightly more restrictive than in the fall *The Impact of Changes in Macroeconomic Conditions on the Agricultural Sector of Tajikistan* Parviz

Khakimov,2015-11-05 Since 2000 Tajikistan has experienced prominent economic growth The average rates of economic growth for the period of 2000 2012 exceed 7 percent AGENCY ON STATISTICS OF TAJIKISTAN AS TAJIKISTAN IN FIGURES 2013 The main drivers of recent growth were labour migration and remittances on the one hand and the Agricultural Sector on the other hand The number of labour migrants in 2013 constitutes 1 2 million FEDERAL MIGRATION SERVICES OF RUSSIAN FEDERATION 2014 In 2013 remittances were approximately equivalent to 4 2 billion USD RUSSIAN CENTRAL BANK 2014 thus being twice as high as the state budget and equivalent to nearly 50 percent of GDP Remittances are the second most important source of the population s income after wages and constitute 35 percent of the population s income AS INCOME AND EXPENDITURE OF POPULATION IN TAJIKISTAN 2013 *Reforming Agricultural Trade for Developing Countries* Alex F. McCalla,John D. Nash,2006-11-09 In the ongoing Doha Development Round of World Trade Organization negotiations developing countries have had much greater leverage due at least in part to their large and growing share of world trade But will the increased influence of developing countries translate into a final agreement that is truly more development friendly What would be key ingredients in such a final outcome of the negotiations and what would the developing countries really get out of it This two volume set seeks to answer these questions This volume Volume 2 addresses the question of how a development friendly outcome to the talks would affect developing countries by quantifying the impact of multilateral trade reform It presents several different approaches to modeling the effects of the outcome of negotiations and then investigates why these and other modeling efforts produce such divergent results Volume 1 is issues oriented It takes up some key questions in the negotiations setting the stage with a historical overview of the Doha Development Agenda to help identify issues of most significance to developing countries and then explores select issues in greater depth Aimed at policymakers and stakeholders this two volume effort puts into the public domain important analytical work that will improve the chance for a pro development outcomes of the Doha round negotiations **Trade Liberalisation and Economic**

Development in Africa Gift Mugano,2021-09-30 This book provides a thorough and rigorous discussion on the impact of trade liberalisation on economic development with a special focus on the African continent The author presents the rationale for trade liberalisation trade liberalisation frameworks the trade liberalisation economic development nexus impediments to trade and contemporary issues of international trade In this book notwithstanding the benefits from trade liberalisation the author shows that African trade as a share of global trade has remained flat at 3% as in 1975 while the continent s exports have remained raw materials and its intra regional trade at less than 15% of total trade which is the lowest in the world UNCTAD 2020 With respect to key economic development indicators such as economic growth poverty levels and

employment levels this book shows that ironically and in direct contrast with the conventional views that trade liberalisation alleviates poverty trade liberalisation in Africa has resulted in high levels of unemployment and low economic growth which ultimately lead to increased poverty In addition this book provides a detailed analysis of why trade liberalisation has failed to yield meaningful benefits to Africa The binding constraints and blockages which prevent positive spin offs on trade liberalisation in Africa are discussed in detail in this book In the same vein the author provides practical strategies which must be adopted by African countries in order to gain from trade liberalisation making this work a must read for African governments academia trade experts regional trading blocs the World Trade Organization and development partners In view of this and as part of the disruptive and structural transformation policies the author discusses case studies and international experience contextualised to Africa as well as strategies for addressing the trade related infrastructure gap production capacities export promotion and aid for trade

Modeling Public Policies in Latin America and the Caribbean Carlos de Miguel,2010 In an increasingly integrated world where the pace of change is accelerating policy decisions need to be taken with little hesitation However their development effectiveness requires that they are also based on solid analytical foundations Given the existence of information asymmetries and coordination failures multilateral development institutions have an opportunity to support their member countries in the assessment of policies that require complex background analysis particularly when their effects spill over beyond the border of any given country In this context the Inter American Development Bank IDB and the Economic Commission for Latin America and the Caribbean ECLAC have formed a partnership to promote a regional network of computable general equilibrium CGE modellers that facilitates the exchange of analytical findings techniques and data with the ultimate objective of better serving policy makers in policy formulation The regional meetings of CGE modellers held annually in a different country of the region have been instrumental in promoting intraregional transfer of analytical technologies and in bringing the region closer to international best practices This book includes a selection of studies discussed in past annual meetings on modelling They deal with issues such as trade policy regional integration trade in

services fiscal policy the impact of food price surges and climate change are based on comparable methodologies and shed light on crucial implications of crucial policy alternatives that Latin American regional policymakers are currently facing
