

## CHAPTER 5: RESEARCH DESIGN AND METHODOLOGY

### 5.1 INTRODUCTION

In Chapter One an orientation of the research was provided. This study focuses on the needs and competencies of school sport managers. These are required for the sport management training of educators, in accordance with the diverse needs of South African schools (cf. par. 1.3.2, p. 12). As a result of the problem statement referred to in Chapter One, the all-encompassing aim of this study is to develop a sport management programme for educator training. It is essential to analyse the existing knowledge, as a background to the current study. In this way, the researcher endeavours to generate new knowledge, which could make sport management and educator training more purposeful, efficient and sustainable. Consequently, this chapter strives to operationalise the theme of the research design and methodology in the current study, as well as to substantiate the choices made in the study.

The research design is applied so that suitable research methods are used to ensure the attainment of the goals and objectives set out in Chapter One. Hence the **reason (rationale)** for a discussion of the research design and methodology: Firstly, this is to provide the plan or blueprint for the research. Secondly, this should enable the researcher to anticipate the appropriate research design, to ensure the validity of the final results. Nevertheless, it is important that different views are analysed; thereafter, the methodology will be discussed. However, first it is important to consider a theoretical framework for the research design.

### 5.2 THEORETICAL FRAMEWORK FOR THE RESEARCH DESIGN AND METHODOLOGY

One of the challenges facing the researcher is the difficulty in relating to and understanding the role and importance of theory in research. Consequently, the concept of theory necessitates some clarification. In this regard, Verma and Mallick (1999:6) as well as Blumberg, Cooper and Schindler (2011:36) are of the opinion that the main role of theory is to help to guide the researcher. In the social sciences, it usually implies a set of statements describing and explaining the relationship between human behaviour and the factors that affect or explain it. Paraphrasing Best and Khan (2006:10), a theory could best be described as an attempt to develop a general explanation for some phenomenon. More specifically, a theory, according to these authors, defines non-observable constructs that are inferred from observable facts and events, and are thought to have an effect on the phenomenon under study. It further implies that a theory describes the relationship among key variables for explaining a current state or predicting future concurrences.

**The Development of Past Tense Morphology in L2 Spanish** M. Rafael Salaberry, 2001-02-12 This book presents an extended analysis of the development of L2 Spanish past tense morphology among L1 English speaking learners The study addresses three major questions 1 what is the developmental pattern of acquisition of past tense verbal morphology among tutored learners 2 what are the relevant factors that may account for the particular distribution of morphological endings especially at the beginning stages and 3 how does instruction affect the movement from one stage to the next The analysis provides a reassessment of the general claim of Andersen s lexical aspect hypothesis and proposes minor changes that may render the hypothesis more appropriate for especially L2 classroom learning The study includes an overview of theoretical positions on the notion of lexical versus grammatical aspect and a comparison of the findings from previous empirical studies on the development of past tense verbal morphology among both classroom and naturalistic learners

**Health Promotion & Education Research Methods** Randy Cottrell, James McKenzie, 2011 The main objective in writing a thesis or dissertation is to teach students how to conduct research in a planned and systematic way Health Promotion Education Research Methods Second Edition provides a comprehensive and thorough presentation of the skills and processes needed to complete high quality research Students will receive an overview of the different approaches to research methods and are introduced to the five chapter thesis or dissertation format Each chapter contains information relevant to the writing of one or more chapters of a thesis or dissertation

Critical Research Design Balazs Szanto, 2025-07-11 This student friendly book demonstrates how to take a critical approach to the research design process to create feasible original and critical research works The author uses a unique model that incorporates three critical review cycles methodological design epistemology and completed research plan in order to ensure that readers have critically engaged with various components of the research proposal Approaching research design as a coherent whole this book focuses on critically understanding how the various components come together as a cohesive and interconnected design as well as to explore how the same basic research idea can lead to a number of different research designs Including sections on both conceptual and methodological designs readers are equipped with the skills and knowledge needed to take a basic research idea and conceptualize a complete and organic design for a research based on it that can make an original contribution to the existing body of knowledge Covering quantitative qualitative and mixed methods approaches and addressing the ethical implications of research this is an essential resource for researchers instructors and students across a

broad range of disciplines in the social and behavioral sciences and humanities

**LEADERSHIP AND ORGANISATIONAL PERFORMANCE** Dr. Godwin C. Arikibe, 1901 Leadership is inherent in every being despite one's job profile. But qualitative training and other traits are very important for the right behaviours. Every follower possesses attributes of a leader but because these are somewhat concealed to lead effectively becomes a huge challenge to many. This book is a result of many years of research. It focused on discovering those behavioural attributes that could combine effectively with the leader's competing roles to enhance his performance. A Competing Value Framework (CVF) was applied to understand the leadership behaviours, characteristics, attributes, and roles that could influence a leader even in the face of contingency factors. The result was quite revealing. Leaders that combine their roles with other attributes, skills, achieve behavioural complexity which are performance enhancing behaviours. Furthermore, leaders are distinguished by their unique mental attitude, particularly in four roles: they play motivation, vision, analytic, and task master roles. Combination of these with other attributes and characteristics enhances the leadership complexity. This book is a useful material for those in the ministries, academia, and organisations of different sizes. It's a book every leader must possess to comprehend the behavioural complexities relevant for organisational performance.

*The Relationship between Language and Spatial Ability* Angel Mizzi, 2017-12-28 This work investigates how different fifth grade students solve spatial verbal tasks and the role of language in this process. Based on a synthesis of theoretical foundations and methodological issues for supporting the relationship between spatial ability and language, this present study examines and classifies strategies used by students as well as the obstacles they encounter when solving spatial tasks in the reconstruction method.
