Abstract. This paper presents ongoing research on the modelling of expressive gesture in multimodal interaction and on the development of multimodal interactive systems explicitly taking into account the role of non-verbal expressive gesture in the communication process. In this perspective, a particular focus is on dance and music as first-class conveyors of expressive and emotional content. Research outputs include (i) computational models of expressive gesture, (ii) validation by means of continuous ratings on spectators exposed to real artistic stimuli, and (iii) novel hardware and software components for the EyeWeb open platform (www.eyeweb.it), such as the recently developed Expressive Gesture Processing Library. The paper starts with a definition of expressive gesture. A unifying framework for the analysis of expressive gesture is then proposed. Finally, two experiments on expressive gesture in dance and music are discussed. This research work has been supported by the EU IST project MDGA (Multimodal Expressive Gesture Applications, www.mdgaproject.org) and the EU MOSART TMR Network.

1. Introduction

Expressive gesture is a key concept in our research (Casurri et al., 2001). This paper tries to face it and introduces two experiments aiming at understanding the non-verbal mechanisms of expressive/emotional communication.

Several definitions of gesture exist in the literature. The most common use of the term is with respect to natural gesture, which is defined as a support to verbal communication. For Cassel and colleagues (1990) "A natural gesture means the types of gestures spontaneously generated by a person telling a story, speaking in public, or holding a conversation". McNeill (1992) in his well-known taxonomy divides the natural gestures generated during a discourse in four different categories: iconic, metaphoric, deictic, and beats. In a wider perspective Kurtenboch and Hulstijn (1990) define gesture as "a movement of the body that conveys information". A survey and a discussion of existing definitions of gesture can be found in (Cadoré and Wanderley, 2000).

In artistic contexts and in particular in the field of performing arts, gesture is often not intended to denote things or to support speech as in the traditional framework of natural gesture, but the information it contains and conveys is related to the

Musical Robots and Interactive Multimodal Systems Jorge Solis, Kia Ng, 2011-07-25 Musical robotics is a multi and trans disciplinary research area involving a wide range of different domains that contribute to its development including computer science multimodal interfaces and processing artificial intelligence electronics robotics mechatronics and more A musical robot requires many different complex systems to work together integrating musical representation techniques expressions detailed analysis and controls for both playing and listening The development of interactive multimodal systems provides advancements which enable enhanced human machine interaction and novel possibilities for embodied robotic platforms This volume is focused on this highly exciting interdisciplinary field This book consists of 14 chapters highlighting different aspects of musical activities and interactions discussing cutting edge research related to interactive multimodal systems and their integration with robots to further enhance musical understanding interpretation performance education and enjoyment It is dichotomized into two sections Section I focuses on understanding elements of musical performance and expression while Section II concentrates on musical robots and automated instruments **Musical Robots and Interactive Multimodal Systems** provides an introduction and foundation for researchers students and practitioners to key achievements and current research trends on interactive multimodal systems and musical robotics

Recent Perspectives on Gesture and Multimodality Anabela Cruz-Santos, Isabel Galhano-Rodrigues, Elena Zagar Galvão, 2019-07-14 What is gesture and what does it do What is the meaning of multimodality What do these concepts signify within the different theoretical approaches to interaction and communication among human beings Why do we study gesture and multimodality The thirteen chapters that make up this volume provide answers to these questions They bring together an eclectic set of recent studies on visible bodily actions conducted by junior and senior researchers and are a testimony to the curiosity and vitality that have always distinguished gesture studies This young yet rapidly growing field investigates the semiotic features of gesture in relation to speech as integral parts of utterances the different uses of gestures with and without speech such as gestures in language acquisition gestures in the performing arts music dance theatre and gestures in Artificial Intelligence

Human Aspects in Ambient Intelligence Tibor Bosse, Diane J. Cook, Mark Neerincx, Fariba Sadri, 2013-09-13 This book presents recent developments in the field of human aspects in Ambient Intelligence This field and the associated workshop series addresses multidisciplinary aspects of AmI with human directed disciplines such as psychology social science neuroscience and biomedical sciences The aim of the workshop series is to get researchers together from these human directed disciplines or working on cross connections of AmI with these disciplines The focus is on the use of knowledge from these disciplines in AmI applications in order to support humans in their daily living in medical psychological and social respects The book plays an important role to get modellers in the psychological neurological social or biomedical disciplines interested in AmI as a high potential application area for their models From the other side the book may make researchers in Computer Science and

Artificial and Ambient Intelligence more aware of the possibilities to incorporate more substantial knowledge from the psychological neurological social and biomedical disciplines in AmI architectures and applications

A Pragmatic Approach to Fluency and Disfluency in Learner Language Maximiliane Frobenius, 2022-11-15 This monograph presents analyses of filled and unfilled pauses cut offs repair discourse markers and other phenomena often referred to as disfluencies in the context of advanced language learners PowerPoint presentations It adopts a multimodal perspective to demonstrate the functions of these elements in interaction Paired with gaze shifts pointing gestures and posture shifts they act as facilitators of joint visual orientation mutual understanding and accountable actions Therefore this volume suggests the name confluency to reflect their potential functionality Confluencies are essential elements of multimodal chunks and multimodal patterns and these are building blocks of a multimodal turn taking mechanism for presentations These concepts are illustrated and discussed based on excerpts from naturally occurring classroom data *Introducing Evolutionary Pragmatics* Ines Adornetti, Francesco Ferretti, 2024-11-19 This collection highlights a range of perspectives on the emerging body of research on evolutionary pragmatics expanding the borders of language evolution research and indicating exciting new directions for the future of the field The volume adopts a broad view of pragmatics providing a counterpoint to classical models of language evolution by exploring the ways in which the origins of language can be traced through the emergence of language structures from use in context The book synthesizes different lines of inquiry ranging from evolutionary linguistics to cognitive linguistics philosophy and cognitive pragmatics among other fields which foreground the impact of the environment on language and of language through speaker use on context The volume is organized around three sections each taking in turn a different dimension of evolutionary pragmatics research the origins of language as seen in animal communication a closer look at the use of language in interaction for the formation of communication channel and linguistic meaning the role of cooperation and competition dynamics for the emergence of language structure This book will be of particular interest to scholars in evolutionary linguistics language origins cognitive pragmatics cognitive archaeology and cognitive semiotics as well as related areas in philosophy psychology and anthropology *Telecinematic Stylistics* Christian Hoffmann, Monika Kirner-Ludwig, 2020-05-14 Over the last two decades the study of discourse in film and television has become one of the most promising research avenues in stylistics and pragmatics due to the dazzling variety of source material and the huge pragmatic range within it Meanwhile with the advent of streaming and the box set film and television themselves are becoming separated by an increasingly blurred line This volume closes a long standing gap in stylistics research bringing together a book level pragmatylistic showcase It presents current developments from the field from two complementary perspectives looking stylistically at the discourse in film and the discourse of and around film This latter phrase comes to mean the approaches which try to account for the pragmatic effects induced by cinematography This might be the camera work or the lighting or the mise en scene or montage The volume takes a multimodal approach looking at word
