Houston,2001 **Chemical Kinetics and Reaction Dynamics** Santosh K. Upadhyay,2007-04-29 Chemical Kinetics and Reaction Dynamics brings together the major facts and theories relating to the rates with which chemical reactions occur from both the macroscopic and microscopic point of view This book helps the reader achieve a thorough understanding of the principles of chemical kinetics and includes Detailed stereochemical discussions of reaction steps Classical theory based calculations of state to state rate constants A collection of matters on kinetics of various special reactions such as micellar catalysis phase transfer catalysis inhibition processes oscillatory reactions solid state reactions and polymerization reactions at a single source The growth of the chemical industry greatly depends on the application of chemical kinetics catalysts and catalytic processes This volume is therefore an invaluable resource for all academics industrial researchers and students interested in kinetics molecular reaction dynamics and the mechanisms of chemical reactions **Molecular Reaction Dynamics** Raphael D. Levine,2009-06-04 Molecular reaction dynamics is the study of chemical and physical transformations of matter at the molecular level The understanding of how chemical reactions occur and how to control them is fundamental to chemists and interdisciplinary areas such as materials and nanoscience rational drug design environmental and astrochemistry This book provides a thorough foundation to this area The first half is introductory detailing experimental techniques for initiating and probing reaction dynamics and the essential insights that have been gained The second part explores key areas including photoselective chemistry stereochemistry chemical reactions in real time and chemical reaction dynamics in solutions and interfaces Typical of the new challenges are molecular machines enzyme action and molecular control With problem sets included this book is suitable for advanced undergraduate and graduate students as well as being supplementary to chemical kinetics physical chemistry biophysics and materials science courses and as a primer for practising scientists **Chemical Kinetics and Dynamics** Jeffrey I. Steinfeld,Joseph Salvadore Francisco,William L. Hase,1989 This book offers a presentation of the macroscopic view of empirical kinetics and the microscopic molecular viewpoint of chemical dynamics
