Blockchain and the Commons Vangelis Papadimitropoulos,2022-11-24 Recent years have seen a surge of interest in the commons based on a simple yet radical idea great improvements in production and management could be achieved by reducing barriers to knowledge exchange and power sharing Ranging from meadows forests and parks to language open source software FLOSS and Blockchain and 3D printers the commons are distributed or common property resources infrastructures that are self managed by their user communities While acknowledging the significant contributions that can be made through commons based peer production this book provides a critical examination of the commons with the aim of contributing to their long term sustainability In particular the book examines the relation of Blockchain to the commons by illustrating the case study of the Commons Stack Drawing on a range of interdisciplinary ideas and methodologies the book argues that there are a number of economic and social barriers that are obstructing the wider reproduction of the commons Problems with access to capital and training the lack of entrepreneurial and managerial skills and the absence of institutional support from governments larger co ops and NGOs are some of the external difficulties facing the commons today Meanwhile localism gated communities vested interests atavism traditionalism ideology conflict neo conservatism and techno elitism represent some of the internal contradictions inherent in the commons Through overcoming these contradictions the ultimate goal is to transform capitalism into the postcapitalism of the commons the creation of a social economy self organised around the commons This book provides vital reading for anyone interested in the commons from economics techno politics and across the social sciences

Retailing Denise T. Ogden,James R. Ogden,Robert Paul Jones,2017-08-02 Light on the fluff solid on the basics the fourth edition of Retailing is a concise text that covers strategic issues with an eye on financial considerations and operations management issues illustrated through retail cases and exercises New co author Robert Paul Jones is Department Chair of Hospitality and Retail Management in the College of Human Sciences at Texas Tech In addition to his extensive academic work Dr Jones has over 25 years of executive leadership and consulting experience in retail and hospitality He uses an Integrated Retail Management flow chart to depict retail functions Most retail texts present students with a series of chapters that provide useful information but fail to explain how the various activities involved in retailing affect each other The 4th edition offers the student an overview of the retail process through the use of an integrated retail management IRM plan The steps involved in retailing as presented in the text are tied together through the IRM plan Expanded coverage of Mobile and e Tailing and included throughout the text and not treated as a stand alone chapter This helps emphasize that e tailing is a form of retailing that uses many of the same models as other forms Includes updated cases and real world examples And omni channel retailing incorporated throughout text
