Static and Evolutive Treaty Interpretation Christian Djeffal, 2016 How should international treaties be interpreted over time This book addresses what evolutive interpretation looks like in reality SHYSTER: A Pragmatic Legal Expert System James Popple, 1993-04-29 Most legal expert systems attempt to implement complex models of legal reasoning But the utility of a legal expert system lies not in the extent to which it simulates a lawyer s approach to a legal problem but in the quality of its predictions and of its arguments A complex model of legal reasoning is not necessary a successful legal expert system can be based upon a simplified model of legal reasoning Some researchers have based their systems upon a jurisprudential approach to the law yet lawyers are patently able to operate without any jurisprudential insight A useful legal expert system should be capable of producing advice similar to that which one might get from a lawyer so it should operate at the same pragmatic level of abstraction as does a lawyer not at the more philosophical level of jurisprudence A legal expert system called SHYSTER has been developed to demonstrate that a useful legal expert system can be based upon a pragmatic approach to the law SHYSTER has a simple representation structure which simplifies the problem of knowledge acquisition Yet this structure is complex enough for SHYSTER to produce useful advice SHYSTER is a case based legal expert system although it has been designed so that it can be linked with a rule based system to form a hybrid legal expert system Its advice is based upon an examination of and an argument about the similarities and differences between cases SHYSTER attempts to model the way in which lawyers argue with cases but it does not attempt to model the way in which lawyers decide which cases to use in those arguments Instead it employs statistical techniques to quantify the similarity between cases It decides which cases to use in argument and what prediction it will make on the basis of that similarity measure SHYSTER is of a general design it can provide advice in areas of case law that have been specified by a legal expert using a specification language Hence it can operate in different legal domains Four different and disparate areas of law have been specified for SHYSTER and its operation has been tested in each of those domains Testing of SHYSTER in these four domains indicates that it is exceptionally good at predicting results and fairly good at choosing cases with which to construct its arguments SHYSTER demonstrates the viability of a pragmatic approach to legal expert system design **Law and Philosophy** Edward Kent, 1970 **Cardozo Journal of International and Comparative Law** ,2000 **International**

Cooperation, Competition Authorities and Transnational Networks Mateusz Błachucki, 2023-11-30 This book presents a comprehensive study of the emergence, functioning and evolution of international cooperation among competition authorities. It presents an in-depth look at network cooperation taking place within international organisations as well as networks based on binding international agreements and various informal networks among others. It further identifies and analyses the forms of international cooperation among national competition authorities (NCAs) that are taking place within transnational competition networks. The book classifies these forms of cooperation by grouping them into three stages: soft, developed and enhanced cooperation, discussing each in detail. It thus reflects the evolution of the international cooperation process and provides insights as to its possible development. This work will be of interest to researchers, academics and advanced students in the fields of competition law, public administration, international relations and those interested in international competition law and its contribution to global public governance.
