Computational Thinking: How computers think, decide and learn, when human limits start and computers champ. Vol.1 Jorge Guerra Pires,2022-07-05 In 2013 I wrote a book 1 At the time I wanted to explain neural networks in simple terms I had high school students at my mind I have expressed my concerns that machine learning was dominating the world and people had no idea about it smartphones were not popular in Brazil and started go gain attention as personal computers Deep learning started to gain momentum on 2012 and nowadays is kind of the rule At the time YouTube was bad pretty bad a must say I used to save the links to my videos as so I could avoid passing through the main page Computational thinking is synonymous of algorithms I cannot think a single computational routine which is not an algorithm after all computers are stupid they need to be told what to do even when it is abstract e g machine learning What is computational think though Think like this a thought experiment Suppose you give your result from your model to someone Do you believe the person would be able to tell the difference between your solution from your algorithm and a human If not this is computational thinking It is a machine i e an algorithm a routine doing human thinking work As we are going to see based on Kasabov s work we may actually be able to send thinking loads to computers in the future Initially this book supposes to be called computational intelligence Nonetheless I thought we do not necessarily need intelligence to build models not in the sense to artificial intelligence or even human intelligence Furthermore as we shall learn from Daniel Kahneman and colleagues we can achieve nice models for decision making even with simple models when compared to humans imagine what we can do with machine learning cloud computing databases such as MongoDB and Firebase Possible public Web developers wanting to expand their horizon here I am being modest I feel any web coder should learn computational thinking as so they can add intelligence to their dummy apps People from computational intelligence waiting to learn new tricks Computer scientists for sure I would recommend to computational biologists and anyone interested in bioinformatics Applied mathematics and computational mathematician for sure Anyone that is opened to new ideas but has a minimum computer programming background Maybe medical doctors and biologists one of my PhD advisors was a surgeon with a PhD in mathematics thus we may have this profile in medicine and especially in biology External resources and tricks My GitHub profile Our sandbox I have used links to my LinkedIn profile to posts related to the discussions Feel free to start a conversation on LinkedIn or to connect Just comment on the posts and I will be noticed I have used several external links to articles online this is in addition to the classical academic reference standard With Special release of My selected assays from Medium on Computer programming Artificial Intelligence 1 Redes Neurais em termos simples como aprendemos pensamos e modelamos https www academia edu 18365339 Redes_Neurais_em_termos_simples_como_aprendemos_pensamos_e_modelamos fbclid IwAR3NLQt003L5QXZQNLSePIxJxUf7NbqsthEjj8rb1zgfpgEgzkiqoNfO0RY Accessed on 30 06 22 **Deep Learning with Python: A Fundamentals Guide to Understanding Machine Learning and Artificial Intelligence with Scikit-Learn,**

Tensorflow, and Sebastian Dark,2018-11 Curious to discover the revolutionary technology that is shaping our future and changing the world Deep learning is a part of the field of computer science and a subset of machine learning that involves computer systems being able to learn unsupervised with data that is unlabeled or unstructured In 2017 AlphaGo which is AI developed by Google DeepMind and started off by only knowing the rules of the game was eventually able to train itself and beat Ke Jie the world No 1 ranked player at the time Although this may not seem that impressive at first it is important to understand that Go is a very complex game that many programmers were not able to trump with AI in the past Although Go is an interesting example the possibilities of using machine learning are limitless From retail to medicine to finance machine learning has the ability to change each industry it comes into contact with In fact this revolution has already begun and will only continue to get bigger According to statista com the artificial intelligence industry is set to grow exponentially in the next few years from 7 Billion in 2018 to 90 Billion in 2025 This isn t something you can afford to miss Without a doubt it is the future However it is as complex as it is revolutionary If you do not have a background or any experience in the field it is easy to get bogged down by all the complicated concepts and term And if you are at a more advanced level the information you find won t be thorough enough In this book you will find the perfect balance between the information being very thorough and being able to understand it Although tailored for beginners it won t contain simple and easily accessible information You will dive deep into the field but will be carefully led through it in a way that will make everything easy to understand even if you do not have a technical background in computer programming In this Guide you will discover What Machine Learning and Deep Learning Is And How You Can Use It To Change The World How The Field Can Be Broken Down And Learned In A Manageable Way Various Applications and Potential of Deep Learning That You Can Utilize That You May Never Have Even Imagined Supervised And Unsupervised Learning And Breaking It Down Step By Step How You Can Create And Train Deep Learning Models Where and How To Install the Best Programs So You Can Get Started Today Sample Codes And Datasets To Practice Along With And much more If you are finally prepared to begin grasping this revolutionary technology at a high level despite what your technical background may be Click Add to Cart Now Get the Kindle eBook version for FREE when you buy the Paperback version of this book   **Deep Learning for Beginners** François Duval,2017-12-24 Buy now Will soon return to 35 99 1 Kindle Store Bestseller in Mathematical Analysis Throughout 2017 Free Kindle eBook for customers who purchase the print book Are you thinking of learning more about Deep Learning If you are looking for a book to help you understand how the deep learning works by using Python and Tensorflow then this is a good book for you Several Visual Illustrations and Examples Equations are great for really understanding every last detail of an algorithm But to get a basic idea of how things work this book contains several graphs which detail each neural networks deep learning algorithms It is contains also several graphs for the practical examples This Is a Practical Guide Book This book will help you explore exactly what deep learning is and will also teach you about why it is so revolutionary and

fascinating The chapters will introduce the reader to the concepts techniques and applications of deep learning algorithms with the practical case studies and walk through examples on which to practice This book takes a different approach that is based on providing simple examples of how deep learning algorithms work and building on those examples step by step to encompass the more complicated parts of the algorithms Python and TensorFlow Codes for the Examples Shown In the Book You will build your Deep Learning Model by using Python and Tensorflow There are many ways to build a deep learning model However it can also be overwhelming when you start because there are so many tools to choose In this book we choose only these two tools Tensorflow and Python Target Users The book designed for a variety of target audiences The most suitable users would include Newbies in computer science techniques and deep learning Professionals in data science and social sciences Professors lecturers or tutors who are looking to find better ways to explain the content to their students in the simplest and easiest way Students and academicians especially those focusing on neural networks and deep learning What s inside this book Overview in Deep Learning Quick Example to start Popular Open Source Library Pre requisite for Deep Learning Deep Learning Presentation Deep Neural Networks Applications with Tensorflow and Python Autoencoders Algorithms Deep Learning for Computer Games Anomaly Detection Glossary of Some Useful Terms in Deep Learning Useful References Frequently Asked Questions Q Is this book for me and do I need programming experience A If you want to smash deep learning with Python this book is for you Little programming experience is required If you already wrote a few lines of code and recognize basic programming statements you will be OK If not online programming courses cover more than what it is required You can do one in a week for free Q Can I loan this book to friends A Yes Under Amazon s Kindle Book Lending program you can lend this book to friends and family for a duration of 14 days Q Does this book include everything I need to become a deep learning expert A Unfortunately no This book is designed for readers taking their first steps in deep learning and further learning will be required beyond this book to master all aspects of deep learning Q Can I have a refund if this book is not fitted for me A Yes Amazon refund you if you aren t satisfied for more information about the amazon refund service please go to the amazon help platform will also be happy to help you if you send us an email at customer_service datasciences book com *Getting Started with Deep Learning* Ricardo Calix,2017-01-18 Ever since 2007 with the explosion in the use of parallel hardware the field of machine learning has become more exciting and more promising It seems that the dream of true AI is finally just around the corner Certainly there are many companies that are starting to rely heavily on AI for their products These include companies in search like Facebook Google as well as retailers and multimedia companies like Amazon and Netflix But more recently many others in the health care and cyber security industries are also interested in what AI and machine learning can do for them Some of these technologies such as Tensorflow which came about around 2015 are new and not widely understood In this book I hope to provide basic discussions of machine learning and in particular deep learning to help readers to quickly get started in using these technologies The book is not a comprehensive

survey on deep learning There are many topics I do not cover here as too much material can be overwhelming to the un initiated There are many good books that cover all the theory in depth and I will mention some of them in the book Instead the goal in this book is to help people new to deep learning to quickly get started with these concepts using python and Tensorflow Therefore a lot of detail is spent on helping the reader to write his or her first deep network classifier Additionally I will try to connect several elements in machine learning which I think are related and are very important for data analysis and automatic classification In general I prefer python and I will try to present all examples using this great language I will also use the more common libraries and the Linux development environment Many people use SKlearn and I have therefore tried to use this library in the Tensorflow examples so that the focus is mainly on creating the deep layer network architectures **Tensorflow Machine Learning** Benjamin Smith,2020-08-24 Machine Learning is an emerging field in the discipline of computer science The possibilities are virtually endless and the things we can achieve with machine learning bridge the gap between reality and science fiction If you are one of those people who developed an interest and learned the basics of machine learning and want to improve your foundation then this is the right book for you Here s a list of some of the distinct features of this book that set it apart from others This book includes a comprehensive and detailed explanation of the concepts No chapter has idle talk Every line in this book has been written while keeping the convenience and interest of the reader in mind This book features some really cool tips and tricks that build upon some very basic and fundamental practices of machine learning Using these tips and tricks will help increase the productivity of your models Each topic addresses some of the most important issues that users experience when working with machine learning For instance in the later parts of this book after discussing deep learning we shift our focus towards the main challenges that arise when creating and implementing a complex and large deep neural network This book aims to give readers a productive reading session In order to accomplish this each chapter has fragmented sections that highlight interesting topics Furthermore the chapter layout guides the reader through the many concepts of machine learning very easily If you re interested in tips and tricks to machine learning with the use of scikit learn keras and Tensorflow then click the BUY NOW button to get started today Getting Started with TensorFlow Aurélien Géron,2017 **Deep Learning for Beginners with TensorFlow** Mark Smart,2018-09-13 This book is an exploration of deep learning in Python using TensorFlow The author guides you on how to create machine learning models using TensorFlow You will know the initial steps of getting started with TensorFlow in Python This involves installing TensorFlow and writing your first code TensorFlow works using the concept of graphs The author helps you know how expressions are represented into graphs in TensorFlow Deep learning in Python with TensorFlow simply involves the creation of neural network models The author helps you understand how to create neural network models with TensorFlow You are guided on how to train such models with data of various types Examples of such data include images and text The process of loading your own data into TensorFlow for training neural network models has also been

discussed You will also know how to use the inbuilt data for training your neural network models You will learn from this book Getting started Building a Neural Network Working with Images Importing Data Subjects include tensorflow python deep learning with python tensorflow machine learning tensor flow tensorflow deep learning cookbook tensorflow for deep learning tensorflow for dummies tensorflow books machine learning with tensorflow tensorflow c concept of graphs neural network neural networks python tensorflow with neural network **Python Machine Learning** François Duval,2017-02-17 Buy now Will soon return to 35 99 Special Offer Below Free Kindle eBook for customers who purchase the print book Are you thinking of learning more about Machine Learning with Practical Examples using Python Machine learning is a field of Artificial Intelligence that uses algorithms to learn from data and make predictions This means that we can feed data into an algorithm and use it to make predictions about what might happen in the future If you are looking for a book to help you understand how the Machine learning works by using Python then this is a good book for you Several Visual Illustrations and Examples Instead of tough math formulas this book contains several graphs and images which detail all algorithms and their applications in all area of the real life Why this book is different This book takes a different approach that is based on providing simple examples of how machine learning algorithms work and building on those examples step by step to encompass the more complicated parts of the algorithms The book is a practical guide through the basic principles of machine learning and how to get started with machine learning using Python based on libraries that make it easy to start Python Codes for the Examples Shown In the Book You will build your machine learning model by using Python Target Users The book designed for a variety of target audiences The most suitable users would include Beginners who want to approach machine learning practices but are too afraid to start Newbies in computer science techniques and machine learning Professionals in data science and social sciences Professors lecturers or tutors who are looking to find better ways to explain the content to their students in the simplest and easiest way Students and academicians especially those focusing on machine learning and deep learning What s Inside this Book Introduction to Machine Learning Essential Libraries and their Installation Basic of Python Language in Machine Learning Data and Inconsistencies in Machine Learning A Roadmap for building Machine Learning Systems Data Cleaning and Preparation Application of Supervised Learning Techniques with Python Applications of unsupervised learning Techniques with python Training Machine Learning Algorithms Combining Different Models for ensemble learning Frequently Asked Questions Q Is this book for me and do I need programming experience A If you want to smash machine learning problems with Python and TensorFlow this book is for you Little programming experience is required If you already wrote a few lines of code and recognize basic programming statements you ll be OK Q Can I loan this book to friends A Yes Under Amazon s Kindle Book Lending program you can lend this book to friends and family for a duration of 14 days Q Does this book include everything I need to become a data science expert A Unfortunately no This book is designed for readers taking their first steps in machine learning and further learning will be

required beyond this book to master all aspects of machine learning Q Can I have a refund if this book is not fitted for me A Yes Amazon refund you if you aren t satisfied for more information about the amazon refund service please go to the amazon help platform will also be happy to help you if you send us an email at customer_service datasciences book com **Deep Learning with Pytorch** Jerry N. P,2019-01-29 This book is an exploration of deep learning in Python using PyTorch The author guides you on how to create neural network models using PyTorch in Python You will know the initial steps of getting started with PyTorch in Python This involves installing PyTorch and writing your first code PyTorch works using the concept of graphs The author helps you know how build neural network graphs in PyTorch Deep learning in Python with PyTorch simply involves the creation of neural network models The author helps you understand how to create neural network models with TensorFlow You are guided on how to train such models with data of various types Examples of such data include images and text The process of loading your own data into PyTorch for training neural network models has also been discussed You will also know how to use the inbuilt data for training your neural network models This book will help you to understand Why PyTorch for Deep Learning Getting Started with PyTorch Building a Neural Network Loading and Processing Data Convolutional Neural Networks Transfer Learning Developing Distributed Applications Word Embeddings Moving a Model from PyTorch to Caffe2 Custom C Extensions Neural Transfer with PyTorch Tags pytorch deep learning python programming python python data science handbook neural network python tensorflow python tensorflow for deep learning python code programming **Deep Learning for Beginners** Steven Cooper,2018-11-06 The Best Deep Learning Book for Beginners If you are looking for a complete beginners guide to learn deep learning with examples in just a few hours then you need to continue reading This book delves into the basics of deep learning for those who are enthusiasts concerning all things machine learning and artificial intelligence For those who have seen movies which show computer systems taking over the world like Terminator or benevolent systems that watch over the population i e Person of Interest this should be right up your alley This book will give you the basics of what deep learning entails That means frameworks used by coders and significant components and tools used in deep learning that enable facial recognition speech recognition and virtual assistance Yes deep learning provides the tools through which systems like Siri became possible Grab your copy today and learn Deep learning utilizes frameworks which allow people to develop tools which are able to offer better abstraction along with simplification of hard programming issues TensorFlow is the most popular tool and is used by corporate giants such as Airbus Twitter and even Google The book illustrates TensorFlow and Caffe2 as the prime frameworks that are used for development by Google and Facebook Facebook illustrates Caffe2 as one of the lightweight and modular deep learning frameworks though TensorFlow is the most popular one considering it has a lot of popularity and thus a big forum which allows for assistance on main problems The book considers several components and tools of deep learning such as the neural networks CNNs RNNs GANs and auto encoders These algorithms create the building blocks which propel

deep learning and advance it The book also considers several applications including chatbots and virtual assistants which have become the main focus for deep learning into the future as they represent the next frontier in information gathering and connectivity The Internet of Things is also represented here as deep learning allows for the integration of various systems via an artificial intelligence system which is already being used for the home and car functions And much more The use of data science adds a lot of value to businesses and we will continue to see the need for data scientists grow This book is probably one of the best books for beginners It s a step by step guide for any person who wants to start learning deep learning and artificial intelligence from scratch When data science can reduce spending costs by billions of dollars in the healthcare industry why wait to jump in If you want to get started on deep learning and the concepts that run artificial technologies don t wait any longer Scroll up and click the buy now button to get this book today **Deep Learning with Python** Daniel Geron,2019-07-31 Buy the Paperback Version of this Book and get the Kindle Book Version for FREEDo you want to learn how to write your own codes and programming and get your computer set up to learn just like humans do Do you want to learn how to write out codes in deep learning without having to spend years going to school to learn to code and how all this works Do you know a bit of Python coding and want to learn more about how this deep learning works This guidebook is the tool that you need to not only learn how to do machine learning but also learn how to take this even further and write some of your own codes in deep learning The field of deep learning is pretty new and many programmers have not been able to delve into the depths of what we can see with this type of programming but with the growing market for products and technology that can act and learn just like the human brain this field is definitely taking off This book will take some time to explore the different Python libraries that will help you to do some deep learning algorithms in no time Investing your time in the Python language and learning the different libraries that are needed to turn this basic programming language into a deep learning machine can be one of the best decisions for you By learning some of the tips in this book you will be able to save time and resources when it comes to your deep learning needs Rather than spending time with other more difficult programming languages or having to go take complicated classes to learn how to do these algorithms we will explore exactly how to do all of the tasks that you need with this type of machine learning You will learn What deep learning is how it is different from machine learning and why Python is such a beneficial language to use with the deep learning algorithms The basics of the three main Python languages that will help you get the work done including TensorFlow Keras and PyTorch How to install the three Python libraries to help you get started A closer look at neural networks what they are why they are important and some of the mathematics of making them work The basics you need to know about TensorFlow and some of the deep learning you can do with this library The basics of the Keras library and some of the deep learning you can do with this library A look at the PyTorch library how it is different from the other two and the basics of deep learning with this library And so much more Even if you are just a beginner with very little programming knowledge but lots of big dreams and

even bigger ideas this book is going to give you the tools that you need to start with deep learning Would you like to know more Scroll to the top of the page and select the BUY NOW button   *Deep Learning* Robert Hack,2020-04-05 Everything You Need to Know About Deep LearningDo you want to know all about Deep Learning Wondering what you need to get started with Deep Learning You Are 1 Click Away From Knowing All About Deep Learning Hello Welcome to this guide to The Ultimate Beginner s Guide To Artificial Intelligence And Neural Networks An understanding of deep learning begins with a precise definition of terms Otherwise you have a hard time separating the media hype from the realities of what deep learning can actually provide Deep learning is part of both AI and machine learning To understand deep learning you must begin at the outside that is you start with AI and then work your way through machine learning and then finally define deep learning This book would help you through this process Why study Deep Learning Has best in class performance on problems that significantly outperforms other solutions in multiple domains This includes speech language vision playing games like Go etc This isn t by a little bit but by a significant amount Reduces the need for feature engineering one of the most time consuming parts of machine learning practice Is an architecture that can be adapted to new problems relatively easily e g Vision time series language etc are using techniques like convolutional neural networks recurrent neural networks long short term memory etc Feature engineering can be automatically executed inside Deep Learning model Can solve complex problems flexible to be adapted to new challenge in the future or transfer learning can be easily applied High automation Deep learning library Tensorflow keras or MATLAB can help users build a deep learning model in seconds without the need of deep understanding More precisely the book will teach you Introduction to Deep Learning History of Deep Learning Conceptual foundations Neural Networks The Building Blocks of Deep Learning training deep networks Convolutional and Recurrent Neural Networks Learning Functions The Future of Deep Learning And so much more Frequently Asked QuestionsQ Do I need special software or hardware to read eBooks A All you need is your PC laptop or hand held device and the free Reader software We offer eBooks in three different formats PDF download EPUB download and Online Reader Our Online Reader requires no software other than an internet browser For downloading we will provide you with a link to download the appropriate Reader software free of charge when you make a purchase Q How to buy kindle eBook A You can purchase Kindle books at any time using a web browser Visit Kindle Store to start browsing To purchase Kindle books using your reading app Tap the Store tab or Shop in Kindle Store Browse or search for the Kindle titles you want to read Select Buy Now So what are you waiting for Buy now to join the millions of people already learning about Deep Learning   Python Machine Learning Oscar Elliot,2021-03-30 The world of machine learning is changing all the time It is so amazing the idea that we are able to take a computer and let it learn as it goes Without having to write out all of the codes that we need for every situation out there or every input that the user may pick we are able to write out codes in machine learning even with Python in order to let the computer or device learn and make decisions on its own This guidebook is going to take a closer

look at how Python machine learning is able to work as well as how you can use some of the tools and techniques that come with this process for your own needs When you are interested in learning more about what machine learning is all about as well as how you can use a part of the coding from Python inside of this process then this guidebook is the tool for you Some of the topics that we will explore when we go through this guidebook will include Understanding some of the basics of machine learning Some of the different parts that you need to know to get started with machine learning and the Python language Understanding the Scikit Learn library and why it is so important to work with this type of library How to work with the K Nearest Neighbors algorithm What are support vector machines random forest algorithm and recurrent neural networks What are linear classifiers How K Means clustering is going to be different from KNN Other great things that you are able to do with Python Machine Learning The field of machine learning is growing exponentially and with the help of Python and all of the cool tools and libraries that come with it you will find that there are endless possibilities of what you will be able to do with it When you are ready to learn more about Python Machine Learning and when you want to be able to work towards your own projects and applications with this cool topic make sure to check out this guidebook to help you get started Scroll to the top of the page and select the buy now button **Python Machine Learning For Beginners** Finn Sanders,2019-05-15 Imagine a world where you can make a computer program learn for itself What if it could recognize who is in a picture or the exact websites that you want to look for when you type it into the program What if you were able to create any kind of program that you wanted even as a beginner programmer without all of the convoluted codes and other information that makes your head spin This is actually all possible The programs that were mentioned before are all a part of machine learning This is a breakthrough in the world of information technology which allows the computer to learn how to behave rather than asking the programmer to think of every single instance that may show up with their user ahead of time it is taking over the world and you may be using it now without even realizing it If you have used a search engine worked with photo recognition or done speech recognition devices on your phone then you have worked with machine learning And if you combine it with the Python programming language it is faster more powerful and easier even for beginners to create your own programs today Python is considered the ultimate coding language for beginners but once you start to use it you will never be able to tell Many of the best programs out there use this language behind them and if you are a beginner who is ready to learn this is a great place to start If you have a program in mind or you just want to be able to get some programming knowledge and learn more about the power that comes behind it then this is the guidebook for you Some of the topics that we will discuss include The Fundamentals of Machine Learning Deep learning And Neural Networks How To Set Up Your Environment And Make Sure That Python TensorFlow And Scikit Learn Work Well For You How To Master Neural Network Implementation Using Different Libraries How Random Forest Algorithms Are Able To Help Out With Machine Learning How To Uncover Hidden Patterns And Structures With Clustering How Recurrent Neural Networks Work And

When To Use The Importance Of Linear Classifiers And Why They Need To Be Used In Machine Learning And Much More This guidebook is going to provide you with the information you need to get started with Python Machine Learning If you have an idea for a great program but you don t have the technical knowledge to make it happen then this guidebook will help you get started Machine learning has the capabilities and Python has the ease to help you even as a beginner create any product that you would like If you want to learn more about how to make the best programs with Python Machine learning scroll up to Click the Add to Cart button to get your book instantly   Getting Started with TensorFlow 2.0 for Deep Learning Muhammad Javed,2019 Learn to develop deep learning models and kickstart your career in deep learning with TensorFlow 2 0 About This Video Explore the latest feature set and modern deep learning APIs in TensorFlow 2 0 Develop computer vision and text sequences based on deep learning models Learn advanced deep learning topics including Keras functional API In Detail Deep learning is a trending technology if you want to break into cutting edge AI and solve real world data driven problems Google s TensorFlow is a popular library for implementing deep learning algorithms because of its rapid developments and commercial deployments This course provides you with the core of deep learning using TensorFlow 2 0 You ll learn to train your deep learning networks from scratch pre process and split your datasets train deep learning models for real world applications and validate the accuracy of your models By the end of the course you ll have a profound knowledge of how you can leverage TensorFlow 2 0 to build real world applications without much effort   Machine Learning with PyTorch and Scikit-Learn Sebastian Raschka,Yuxi (Hayden) Liu,Vahid Mirjalili,2022-02-25 This book of the bestselling and widely acclaimed Python Machine Learning series is a comprehensive guide to machine and deep learning using PyTorch s simple to code framework Purchase of the print or Kindle book includes a free eBook in PDF format Key Features Learn applied machine learning with a solid foundation in theory Clear intuitive explanations take you deep into the theory and practice of Python machine learning Fully updated and expanded to cover PyTorch transformers XGBoost graph neural networks and best practices Book DescriptionMachine Learning with PyTorch and Scikit Learn is a comprehensive guide to machine learning and deep learning with PyTorch It acts as both a step by step tutorial and a reference you ll keep coming back to as you build your machine learning systems Packed with clear explanations visualizations and examples the book covers all the essential machine learning techniques in depth While some books teach you only to follow instructions with this machine learning book we teach the principles allowing you to build models and applications for yourself Why PyTorch PyTorch is the Pythonic way to learn machine learning making it easier to learn and simpler to code with This book explains the essential parts of PyTorch and how to create models using popular libraries such as PyTorch Lightning and PyTorch Geometric You will also learn about generative adversarial networks GANs for generating new data and training intelligent agents with reinforcement learning Finally this new edition is expanded to cover the latest trends in deep learning including graph neural networks and large scale transformers used for natural language processing NLP This PyTorch book

is your companion to machine learning with Python whether you re a Python developer new to machine learning or want to deepen your knowledge of the latest developments What you will learn Explore frameworks models and techniques for machines to learn from data Use scikit learn for machine learning and PyTorch for deep learning Train machine learning classifiers on images text and more Build and train neural networks transformers and boosting algorithms Discover best practices for evaluating and tuning models Predict continuous target outcomes using regression analysis Dig deeper into textual and social media data using sentiment analysis Who this book is for If you have a good grasp of Python basics and want to start learning about machine learning and deep learning then this is the book for you This is an essential resource written for developers and data scientists who want to create practical machine learning and deep learning applications using scikit learn and PyTorch Before you get started with this book you ll need a good understanding of calculus as well as linear algebra   Mastering TensorFlow 2.x Rajdeep,2022-03-24 Work with TensorFlow and Keras for real performance of deep learning KEY FEATURES Combines theory and implementation with in detail use cases Coverage on both TensorFlow 1 x and 2 x with elaborated concepts Exposure to Distributed Training GANs and Reinforcement Learning DESCRIPTION Mastering TensorFlow 2 x is a must to read and practice if you are interested in building various kinds of neural networks with high level TensorFlow and Keras APIs The book begins with the basics of TensorFlow and neural network concepts and goes into specific topics like image classification object detection time series forecasting and Generative Adversarial Networks While we are practicing TensorFlow 2 6 in this book the version of Tensorflow will change with time however you can still use this book to witness how Tensorflow outperforms This book includes the use of a local Jupyter notebook and the use of Google Colab in various use cases including GAN and Image classification tasks While you explore the performance of TensorFlow the book also covers various concepts and in detail explanations around reinforcement learning model optimization and time series models WHAT YOU WILL LEARN Getting started with Tensorflow 2 x and basic building blocks Get well versed in functional programming with TensorFlow Practice Time Series analysis along with strong understanding of concepts Get introduced to use of TensorFlow in Reinforcement learning and Generative Adversarial Networks Train distributed models and how to optimize them WHO THIS BOOK IS FOR This book is designed for machine learning engineers NLP engineers and deep learning practitioners who want to utilize the performance of TensorFlow in their ML and AI projects Readers are expected to have some familiarity with Tensorflow and the basics of machine learning would be helpful TABLE OF CONTENTS 1 Getting started with TensorFlow 2 x 2 Machine Learning with TensorFlow 2 x 3 Keras based APIs 4 Convolutional Neural Networks in Tensorflow 5 Text Processing with TensorFlow 2 x 6 Time Series Forecasting with TensorFlow 2 x 7 Distributed Training and DataInput pipelines 8 Reinforcement Learning 9 Model Optimization 10 Generative Adversarial Networks   *First Contact with Tensorflow* Torres Viñals Torres,2016   **Programming With Python** Frank Millstein,2020-09-05 Programming With Python 4 BOOK BUNDLE Deep Learning with Keras Here Is a
