Why "Learn" ?

- Machine learning is programming computers to optimize a performance criterion using example data or past experience.

- There is no need to "learn" to calculate payroll

- Learning is used when:
  - Human expertise does not exist (navigating on Mars),
  - Humans are unable to explain their expertise (speech recognition)
  - Solution changes in time (routing on a computer network)
  - Solution needs to be adapted to particular cases (user biometrics)
