sustained the field of study over the past fifty years. Many of these contributions were originally published as a Deutschmann Scholarly Essay in the *Mass Communication and Society* journal and together they comprise a remarkable source of knowledge equipped to lead mass communications theory through the emergence of new technologies and the evolution of communications in the 21st century. Moreover, the contributions gathered in this volume contradict any critics who may claim the theories of the 20th century have outlived their usefulness for these prove to guide contemporary research as forcefully as ever in the digital era. Validating the classic media theories across time and their various forms constitute the second focal section of this volume. Finally, senior media scholars offer their views on the future directions in which mass communication theories can be advanced.

Arguing for a General Framework for Mass Media Scholarship W. James Potter, 2008-12-11. *Arguing for a General Framework for Mass Media Scholarship* challenges scholars and students to consider and reconsider what we know about media and how we think about media. As such, the book provides an important framework for thinking about knowledge regardless of the discipline. The text provides all of the necessary tools to move the field forward in a way that will increase the rigor of the work being done and augment the overall profile of the discipline.

Dana Mastro, University of Arizona. In this groundbreaking book, W. James Potter presents an innovative perspective to media scholars and students who are frustrated with the fragmentation of research findings across so many journals, books, and fields. *Arguing for a General Framework for Mass Media Scholarship* presents a clear plan for a more efficient way to build knowledge about the mass media so that it can be better organized and made more useful.

Key Features:

- Conducts an in-depth analysis of mass media scholarship's four major facets: effects, content, audiences, and organizations.
- Presents a significant shift in conceptualizing media effects and ways research can be conducted to generate more useful knowledge about media influence.
- Develops narrative line as a tool to guide analyses about how content decisions are made by producers.
- Synthesizes a system of explanation about why audiences attend to certain messages and how individuals construct meaning from those messages.
- Incorporates an analysis of mass media organizations to provide greater context of understanding messages and their effects on individuals and macro units in society.

The book will play an important role in providing structure to a broad, fragmented discipline. I believe it will, at the very least, create important dialogues about what we now know, understand about areas of mass media, and where we should move as a discipline. This book is clearly a call to arms for mass media scholars to ratchet up the quality of research and what we know to see the interconnections within and among strands of scholarship and to move forward in a more efficient, organized manner. Professor Potter should be commended for this.

Roger Cooper, Ohio University. This book is that call to action that comes forward every few years to wake us up and challenge our ways of doing things, not by being radical but via synthesis. I've been waiting for several years for a book like this.

Sahara Byrne, Cornell University.

The Media Effect Jim Willis, 2007-06-30. In a postmodern age where the media's depictions of reality serve as stand-ins for the real thing for so many Americans, how much government policy is being made on the basis of those mediated

realities and on the public reaction to them When those mediated depictions deviate from the truth of the actual situation how serious a situation is that Time and again both anecdotal evidence and scientific research seem to confirm that the news media often influence government action At the least they speed up policy making that would otherwise take a slower more reasoned course Sometimes the media serve as the communication link among world leaders who may be ideological enemies Because of the enduring popularity of television news government leaders monitor the networks story selections and track public opinion trends generated by interviews done in these stories These then become the substance of proposed legislation and or executive action as politicians strive to prove themselves able listeners to the heartland of America and also prove themselves worthy of re election This book examines many specific events that show how major news operations either painted a truthful or distorted picture of national and international events and how governmental leaders responded following those representations

International Media Communication in a Global Age Guy Golan, Thomas Johnson, Wayne Wanta, 2009-09-10 This volume provides a comprehensive examination of key issues regarding global communication focusing particularly on international news and strategic communication It addresses those news factors that influence the newsworthiness of international events providing a synthesis of both theoretical and practical studies that highlight the complicated nature of the international news selection process It also deals with international news coverage presenting research on the cross national and cross cultural nature of media coverage of global events in the interdisciplinary context of research on political communication war coverage new technologies and online communication The work concludes with a focus on global strategic communications in the age of globalization global economies and cross national media ownership chapters here provide readers with some of the most up to date research on international advertising public relations and other key issues in international communications With contributions from many of the leading scholars in the field of international media communication research this collection presents a valuable resource for advancing knowledge and understanding of the complicated international communication phenomenon It will be of value to upper level undergraduates and graduate students in mass media and communication programs and to scholars whose research focuses on global communication research

Online Journalism Richard Craig, 2005 Learn to report write and edit for online media with ONLINE JOURNALISM with InfoTrac Created specifically with the Internet in mind this communication text will help you explore the writing opportunities associated with online media Interviews with online professionals are included throughout the text to give you an idea of exactly what the job of the online journalist entails A comprehensive Web site helps keep the book up to date and provides additional material including sound clips of some of the book s interviewees

The SAGE International Encyclopedia of Mass Media and Society Debra L.
