Microalgae E. W. Becker, 1994 The author presents a state of the art account of research in algal production and utilization Dr Becker provides a compilation of the different methods employed worldwide for the artificial cultivation of different microalgae including recipes for culture media description of outdoor and indoor cultivation systems as well as harvesting and processing methods The book will be essential reading for advanced undergraduates postgraduates and researchers in the field

Proteins: Sustainable Source, Processing and Applications Charis M. Galanakis, 2019-05-30 Proteins Sustainable Source Processing and Applications addresses sustainable proteins with an emphasis on proteins of animal origin plant based and insect proteins microalgal single cell proteins extraction production the stability and bioengineering of proteins food applications e g encapsulation films and coatings consumer behavior and sustainable consumption Written in a scientific manner to meet the needs of chemists food scientists technologists new product developers and academics this book addresses the health effects and properties of proteins highlights sustainable sources processes and consumption models and analyzes the potentiality of already commercialized processes and products This book is an integral resource that supports the current applications of proteins in the food industry along with those that are currently under development Supports the current applications of proteins in the food industry along with those that are under development Connects the properties and health effects of proteins with sustainable sources recovery procedures stability and encapsulation Explores industrial applications that are affected by aforementioned aspects

Chemistry and Chemical Technologies in Waste Valorization Carol Sze Ki Lin, 2018-08-13 The series Topics in Current Chemistry Collections presents critical reviews from the journal Topics in Current Chemistry organized in topical volumes The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology medicine and materials science The goal of each thematic volume is to give the non specialist reader whether in academia or industry a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed The coverage is not intended to be an exhaustive summary of the field or include large quantities of data but should rather be conceptual concentrating on the methodological thinking that will allow the non specialist reader to understand the information presented Contributions also offer an outlook on potential future developments in the field
