Ethics in a Capitalist Economy Robert CB Miller, 2025-11-13 In a novel application of the work of neo Aristotelian virtue ethics to the philosophy of business Robert CB Miller argues that free market capitalism requires virtues to mitigate its flaws and to enhance its strengths Ethics in a Capitalist Economy begins with an outline of modern virtue ethics deriving from Aristotle and Aquinas and reinvigorated in the 20th century by writers including Elizabeth Anscombe and Philippa Foot Taking up the idea that human nature determines the virtues Miller sets out three types of virtue specific to economic activity contractual behavioural and entrepreneurial With reference to major historical and contemporary thinkers including Adam Smith John Locke David Hume Alasdair MacIntyre Mary Midgeley and Steven Pinker the book shows the flaws in the market economy and the ways in which these flaws can be mitigated by the application of particular virtues in order to encourage human flourishing The book includes three case studies investigating the practice or absence of virtues in real world situations on the career of Warren Buffett on insights from behavioural economics and on the philanthropic efforts of business leaders This book combines practical considerations with a detailed and accessible reading of the theory of virtue ethics and its relation to human nature in political economy *Intermediate Microeconomics* Thomas J. Raced Markets Lisa Tilley, Robbie Shilliam, 2021-05-30 Despite rich archives of work on race and the global economy most notably by scholars of colour and Global South intellectuals the discipline of Political Economy has largely avoided an honest confrontation with how race works within the domains it studies not least within markets By way of corrective this book draws together scholarship on the material function of race at various scales in the global political economy The collective

provocation of the contributors to this volume is that race has been integral to the formation of capitalism as extensively laid out by the racial capitalism literature and takes on new forms in the novel market spaces of neoliberalism The chapters within this volume also reinforce that the current political conjuncture marked by the ascension of neo fascist power cannot be defined by an exceptional intrusion of racism nor can its racism be dismissed as epiphenomenal Raced Markets will be of great value to scholars students and researchers interested in political economy and racial capitalism as well as those willing to explore how race takes on new forms in the novel market spaces of contemporary neoliberalism The chapters in this book were originally published as a special issue of the New Political Economy Микроэкономика 2-е изд., пер. и доп. Feldman,2012-11-30 This is a textbook for an intermediate level course in microeconomics that uses calculus throughout Most of the competition either uses no calculus or relegates the math to footnotes and appendices The text also focuses on theory rather than empirical data To motivate the analysis the authors include references to real events and firms with no distracting separate boxes **Intermediate Microeconomics with Calculus: A Modern Approach** Varian, Hal R,2014-04-10 The 1 text is still the most modern presentation of the subject and gives students tools to develop the problem solving skills they need for the course and beyond
