Graduate Programs in Engineering and Computer Science, 2002 **Journey to the Ph.D.** Anna L. Green, LeKita V. Scott, 2023-07-03 As a new generation of African Americans completes college, an increasing number of students are aspiring to the Ph.D. as a stepping stone to a career in the academy and to fully participate in shaping our society. Most African Americans are conscious that they are the first in their families to embark on this journey. They are aware they will meet barriers and prejudice, are likely to face isolation and frustration, and find few sources of support along the way. This book, by twenty-four Black scholars who have been there, offers a guide to aspiring doctoral students to the formal process and to the personal, emotional, and intellectual challenges they are likely to face. The authors come from a wide range of disciplines, from computing, education, and literature to science and sociology. Although their experiences and backgrounds are as varied as they are as individuals, their richly diverse chapters cohere into a rounded guide to the issues for those who follow in their footsteps. From questioning the reader about his or her reasons for pursuing a doctorate, offering advice on financial issues, the choice of university and doctoral program, and relocation, through the process and timetable of application, interviews, acceptance, and rejection, the authors go on to describe their own journeys and the lessons they have learned.

These men and women write candidly about their experiences the strategies they used to maintain their motivation make the transition from HBCUs to PWIs balance family and work make the right choices and keep focussed on priorities They discuss how to work effectively with advisors and mentors make all important connections with teachers and build professional and personal support networks They recount how they dealt with tokenism established credibility handled racism maintained their values and culture and persuaded supervisors to legitimize their research interests in African American issues This is both an inspirational and practical book for every African American considering pursuit of a doctoral degree **Peterson's Graduate Programs in Engineering and Applied Sciences, 1996** Peterson's Guides, Peterson's Guides Staff, Peterson's, 1995-12-10 Graduate students depend on this series and ask for it by name Why For over 30 years it s been the only one stop source that supplies all of their information needs The new editions of this six volume set contain the most comprehensive information available on more than 1 500 colleges offering over 31 000 master s doctoral and professional degree programs in more than 350 disciplines New for 1997 Non degree granting research centers institutes and training programs that are part of a graduate degree program Five discipline specific volumes detail entrance and program requirements deadlines costs contacts and special options such as distance learning for each program if available Each Guide features The Graduate Adviser which discusses entrance exams financial aid accreditation and more Interest in these fields has never been higher And this is the source to the 3 400 programs currently available from bioengineering and computer science to construction management **The College Buzz Book** ,2006-03-23 In this new edition Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions as well as the schools responses to the comments Each 4 to 5 page entry is composed of insider comments from students and alumni as well as the schools responses to the comments **Graduating Engineer** ,1993 *Hispanic Engineer & IT* ,1998-11 Hispanic Engineer Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans *SWE* ,2005 **How to Pay for Your Degree in Engineering 2006-2008** Gail Ann Schlachter, R.
