

Mozart Sonata K. 281 Analysis

Sonata form is the musical form that has been most widely used then any other form. It really took shape as a main form during the Classical period.

It is usually used a first movement in a multi-movement piece and is commonly referred as Sonata-Allegro form. The concept behind it was to try and find a way to organize or categorize musical ideas into a movement based on a particular "key." While this form has a formula or approach to it. It is rather rigid and leaves itself to be very open. It uses a 3 part binary form that has an Exposition, Development and Recapitulation. Many composers have developed and expanded this style of music composition.

Mozart being the subject of this paper is also one of the composer known for his strong and clear understanding of Sonata form in his music. This paper will examine one of his piano sonatas entitled, Piano Sonata K. 281 in Bb Major. As stated above, Sonata form has 3 parts. The first of these parts is the exposition.

This section has the primary material for the movement that is broken down into 4 sections of its own. The first subject, transition, second subject and codetta. The first section of the exposition in the Mozart (which for the remainder of the paper the piece will be referred to "the Mozart") is in Bb major. The first subject is split into 8 bar phrases.

The first phrase acts more like an introduction to the second part of the first subject. The first two bars act like mini cadences. They go as follows This is followed by another two bars that also act like mini cadences, however, they don't set any sort of primary ideas. Their little motif ideas merely allow the composer an easier transition into repeating the first two bars.

Naturally, Mozart does that by not only repeating the first two bars but also putting it down an octave. He finishes up this first phrase by bring in a new motivic idea and then setting up a rhythmic ostinato to help get into the second phase of the first subject. Its also noted that he ends it with a perfect authentic cadence of V – I. The second phrase is a bit different.

Mozart keeps the same rhythm in the bass for the first 4 bars of the phrase, with appropriate chord changes. He also uses those first 4 bars to do a mini-development of the first two bars of the piece. It uses the same type f upwards motion and long ending note. This repetition stays until the end of the second phrase and helps push the piece forward into help the modulation into the dominant. As the piece is transiting into the next subject, the new key for the second subject is already put into place. The transition section is in F Major.

The transition section changes the mood in preparation for second subject section through mood metamorphosis. For the first 4 measures of the transition, the rhythm in the left hand follows an Alberti bass pattern while the rhythm in the right hand is more melodic and moving. The transition

Analysis of 18th- and 19th-Century Musical Works in the Classical Tradition David Beach, Ryan McClelland, 2012-05-04 Analysis of 18th and 19th Century Musical Works in the Classical Tradition is a textbook for upper level undergraduate and graduate courses in music analysis It outlines a process of analyzing works in the Classical tradition by uncovering the construction of a piece of music the formal harmonic rhythmic and voice leading organizations as well as its unique features It develops an in depth approach that is applied to works by composers including Haydn Mozart Beethoven Schubert Schumann and Brahms The book begins with foundational chapters in music theory starting with basic diatonic harmony and progressing rapidly to more advanced topics such as phrase design phrase expansion and chromatic harmony The second part contains analyses of complete musical works and movements The text features over 150 musical examples including numerous complete annotated scores Suggested assignments at the end of each chapter guide students in their own musical analysis

The Analysis and Cognition of Melodic Complexity Eugene Narmour, 1992-11 In this work Eugene Narmour extends the unique theories of musical perception presented in *The Analysis and Cognition of Basic Melodic Structures* The two books together constitute the first comprehensive theory of melody founded on psychological research Narmour's earlier study dealt with cognitive relations between melodic tones at their most basic level After summarizing the formalized methodology of the theory described in that work Narmour develops an elaborate and original symbology to show how sixteen archetypes can combine to form some 200 complex structures that in turn can chain together in a theoretically infinite number of ways He then explains and speculates on the cognitive operations by which listeners assimilate and ultimately encode these complex melodic structures More than 250 musical examples from different historical periods and non Western cultures demonstrate the panstylistic scope of Narmour's model Of particular importance to music theorists and music historians is Narmour's argument that melodic analysis and formal analysis though often treated separately are in fact indissolubly linked *The Analysis and Cognition of Melodic Complexity* will also appeal to ethnomusicologists psychologists and cognitive scientists
