Gavrilova,Vipin Kumar,Youngsong Mun,C.J. Kenneth Tan,Osvaldo Gervasi,2004-04-26 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems For this reason Computational Science though originating from the need to solve the most challenging problems in science and engineering computational science is the key player in the fight to gain fundamental advances in astronomy biology chemistry environmental science physics and several

other scientific and engineering disciplines is increasingly turning its attention to all fields of human activity. In all activities in fact intensive computation, information handling, knowledge synthesis, the use of ad hoc devices, etc. increasingly need to be exploited and coordinated regardless of the location of both the users and the various and heterogeneous computing platforms. As a result, the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications: interoperable and ubiquitous. Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications ICCSA 2004 held in Assisi, Italy, May 14-17, 2004.

Voice Over MPLS Daniel Minoli, 2002-05-01. MPLS (Multi Protocol Label Switching) is a controversial new protocol that vastly simplifies Internet traffic and effectively removes obstacles to Voice Over IP applications. Here is the first book to thoroughly explain and evaluate MPLS specifically for the voice markets. Explains a potentially disruptive technology for telephony. Shows providers how to protect their revenues during deployment.

Details key engineering problems such as classes of service traffic engineering overlays and more Carriers see MPLS as the way to deliver quality of service for voice over IP and over 80% of network traffic in North America is projected to be IP based by the end of 2002 At that point MPLS will be mandatory
