**Multicultural Psychology** Jeffery Scott Mio, Lori A. Barker, Melanie M. Domenech Rodríguez, John Gonzalez, 2023

Throughout the years that we have taught courses on multicultural psychology and attended conference presentations and workshops on this topic what has stuck with us are the stories people felt compelled to tell. In fact the genesis of this book was a student's reaction paper that was so moving we felt it had to be published. Thus we planned this book around stories, narratives, or anecdotes that illustrate important aspects of scientific studies and other professional writings in the field of multicultural psychology. The personal stories from our students have generally not been edited for grammar, although some markedly ungrammatical phrases and sentences were modified to make them a bit more grammatical. We did this to maintain the flavor of their stories from the heart, which seemed to illustrate the academic points we are trying to make. In general, science tells us that anecdotes are not sufficient evidence to prove one's point. Although we agree with that stance from a scientific perspective and do not substitute anecdotes for scientific investigation, we do use anecdotes as central points around which to build our case for multicultural issues based on science. In addition, multicultural psychology emphasizes the value of integrating quantitative and qualitative methods to accurately capture the richness of diverse cultures and communities. Thus, rather than substituting for science, our anecdotes are prototypes for scientific investigation. For example, science tells us that there are differences in the way in which men and women communicate. We illustrate those differences by presenting anecdotes highlighting the common experience women have of sometimes being shut out of conversations, particularly ones that are about male topics. Science tells us that there are various stages or statuses of racial identity, and we present some prototypical anecdotes that illustrate how those statuses of racial identity affect one's perceptions and life experiences. Science tells us that clients of color, now referred to as BIPOC (Black Indigenous and People of Color), may have very different reactions to European American therapists, and we present an anecdote that conveys a typical reaction to a European American therapist who did not approach a BIPOC family of color in a culturally sensitive manner. Again, these stories are meant not to replace science but to enrich science, to add texture to the clean and sometimes sterile lines of science.

**Multicultural Psychology** Jeffery Scott Mio, Lori Barker-Hackett, Jaydee Tumbaling, 2012. *Multicultural Psychology: Understanding Our Diverse Communities*, Third Edition, combines quantitative and qualitative research with anecdotal material to examine an array of multicultural issues and capture the richness of diverse cultures. Other issues covered in the text include gender, sexuality, age, and ability. The authors provide a strong, vivid, and personal voice to the text, richly populating it with anecdotes from themselves, their students, and other contributors, and using them as central points around which to build their case for multicultural issues based on science. **FEATURES** Provides narrative, first-person accounts by people of all ages and cultures to illustrate the points discussed in the text. **Multicultural Psychology** Jeffery Mio, Lori Barker-Hackett, Jaydee Tumaming, 2008-06-23

In this thoroughly updated revision of *Multicultural Psychology* the authors once again use their own personal stories and experiences along with those of students as a means of entry to scientific and professional writing on multicultural psychology. In doing so they engage students in the presentation of quantitative and qualitative research on multicultural issues while capturing the richness of diverse cultures. The text focuses on compelling topics such as differences in worldviews and communication, racial/cultural identity, development issues of racism, immigration and nonracial populations of diversity such as gender, sexuality, age and ability. The authors integrate issues specific to populations of diversity throughout the chapters as opposed to covering such issues in distinct chapters.
