Intelligent Internet of Things Networks Haipeng Yao, Mohsen Guizani, 2023-06-09 This book provides an overview of the Internet of Things Network and Machine Learning and introduces Internet of Things architecture It designs a new intelligent IoT network architecture and introduces different machine learning approaches to investigate solutions It discusses how machine learning can help network awareness and achieve network intelligent control It also discusses the emerging network techniques that can enable the development of intelligent IoT networks This book applies several intelligent approaches for efficient resource scheduling in networks It discusses Mobile Edge Computing aided intelligent IoT and focuses mainly on the resource sharing and edge computation offloading problems in mobile edge networks The blockchain based IoT which allows fairly and securely renting resources and establishing contracts is discussed as well The Internet of Things refers to the billions of physical devices that are now connected to and transfer data through the Internet without requiring human to human or human to computer interaction According to Gartner's prediction there will be more than 37 billion IoT connections in the future year of 2025 However with large scale IoT deployments IoT networks are facing challenges in the aspects of scalability privacy and security The ever increasing complexity of the IoT makes effective monitoring overall control optimization and auditing of the network difficult Recently artificial intelligence AI and machine learning ML approaches have emerged as a viable solution to address this challenge Machine learning can automatically learn and optimize strategy directly from experience without following pre defined rules Therefore it is promising to apply machine learning in IoT network control and management to leverage powerful machine learning adaptive abilities for higher network performance This book targets researchers working in the Internet of Things networks as well as graduate students and undergraduate students focused on this field Industry managers and government research agencies in the fields of the IoT networks will also want to purchase this book

Cybersecurity of Digital Service Chains Joanna Kołodziej, Matteo Repetto, Armend Duzha, 2022-04-06 This open access book presents the main scientific results from the H2020 GUARD project The GUARD project aims at filling the current technological gap between software management paradigms and cybersecurity models the latter still lacking orchestration and agility to effectively address the dynamicity of the former This book provides a comprehensive review of the main concepts architectures algorithms and non technical aspects developed during three years of investigation the description of the Smart Mobility use case developed at the end of the project gives a practical example of how the GUARD platform and related technologies can be deployed in practical scenarios We expect the book to be interesting for the broad group of researchers engineers and professionals daily experiencing the inadequacy of outdated cybersecurity models for modern computing environments and cyber physical systems

Intelligent Algorithms in Software Engineering Radek Silhavy, 2020-08-08 This book gathers the refereed proceedings of the Intelligent Algorithms in Software Engineering Section of the 9th Computer Science On line Conference 2020 CSOC 2020 held on line in

April 2020 Software engineering research and its applications to intelligent algorithms have now assumed an essential role in computer science research In this book modern research methods together with applications of machine and statistical learning in software engineering research are presented

NEXT GENERATION COMPUTING - CONVERGENCE OF EDGE AI, 7G/8G NETWORKS, BRAIN COMPUTER INTERFACES S. R. Jena, Dr. Dileep Kumar M., Dr. Sohit Agarwal, J. V. N. Ramesh, 2025-04-02 This book is a comprehensive guide that explores the transformative impact of three cutting edge technologies Edge AI 7G 8G Networks and Brain Computer Interfaces BCIs on the future of computing Next Generation Computing Convergence of Edge AI 7G 8G Networks and Brain Computer Interfaces aims to be a seminal work that not only educates but also inspires its readers to harness the power of driving the convergence of Edge AI 7G 8G Networks and BCIs which collectively promise to revolutionize the computing landscape This convergence will enable unprecedented levels of data processing connectivity and human machine interaction paving the way for innovative applications and solutions However there is a significant knowledge gap in understanding how these technologies interconnect and how they can be leveraged to create new opportunities This book aims to fill that gap by providing a detailed interdisciplinary perspective on the convergence of these technologies
