Integrated Water Management in Canada Dan Shrubsole,Dan Walters,Barbara Veale,Bruce Mitchell,2018-12-07 This volume provides readers with an opportunity to learn from front line water managers of watershed based agencies across Canada about integrated water management or integrated water resource management In common with practice in much of

the world the responsibility for implementing integrated watershed management in Canada is fragmented Each province and territory in Canada has developed unique approaches or governance models to guide decision making in that regard Thus this edited volume enables readers from around the world to gain insight on the best practices in Canada for achieving success and addressing barriers to implement IWM Although there remains non consensus about how to best approach river basin management some of the main observations include There is a need to balance a focus on the big picture with scoping the scale and scope of planning activities in order that feasible and effective solutions can be implemented Three types of integration are popular among the agencies included in the book i among environment economy and society ii interactions between people and the environment and iii integration or coordination of administrative activities Much more attention is required to achieving effective engagement from Indigenous communities The chapters were originally published in a special issue of the International Journal of Water Resources Development

**Watershed Management Approach for the San Diego Region**, 1997 *River Ecology and Management* Robert Naiman, Robert E. Bilby, 2001-02-16 As the vast expanses of natural forests and the great populations of salmonids are harvested to support a rapidly expanding human population the need to understand streams as ecological systems and to manage them effectively becomes increasingly urgent The unfortunate legacy of such natural resource exploitation is well documented For several decades the Pacific coastal ecoregion of North America has served as a natural laboratory for scientific and managerial advancements in stream ecology and much has been learned about how to better integrate ecological processes and characteristics with a human dominated environment These in sightful but hard learned ecological and social lessons are the subject of this book Integrating land and rivers as interactive components of ecosystems and watersheds has provided the ecological sciences with impor tant theoretical foundations Even though scientific disciplines have begun to integrate land based processes with streams and rivers the institutions and processes charged with managing these systems have not done so successfully As a result many of the watersheds of the Pacific coastal ecoregion no longer support natural settings for environmental processes or the valuable natural resources those processes create An important role for scientists educators and decision makers is to make the integration between ecology and con sumptive uses more widely understood as well as useful for effective management
