*Investment Banking Jobs 101: Know Your Product Groups* Brian DeChesare, 2012-08-21 ABOUT THE BOOK Ah yes the industry group vs product group debate Just like the debate over cardio vs strength training models vs bottles and boutiques vs bulge brackets there s so much fervor on both sides that you d almost think war was about to break out Actually I lied it s not quite that heated but let s dive right into the debate and see what the arguments for both sides are Say What Product groups always work on a specific deal type such as M A or debt across all different industries examples include Mergers Acquisitions Equity Capital Markets Debt Capital Markets Leveraged Finance Restructuring So if you re in the M A group you ll always work on acquisitions of other companies across all industries and you ll build so many merger models that you may get Excel burned into your retina With industry groups by contrast you work within one industry but on many different types of deals equity debt M A and so on Examples include Healthcare Natural Resources Oil Gas and Mining Technology Media Telecommunications TMT Financial Institutions Group FIG Industrials Real Estate Investment Banking Pretty simple right A False Dichotomy Except that this division is wrong or at least not 100% accurate There are several sub divisions of groups at a bank 1 Origination These groups market and pitch for new clients mostly for financings 2 Advisory You advise companies on buying other companies M A Gordon Gekko 3 Coverage You do both origination and advisory work here but you re focused on a specific sector such as industrials When most people talk about industry groups they re referring to coverage groups So there s more to it than the industry vs product group distinction and the notion that industry groups are 100% marketing and product groups are 100% execution is wrong EXCERPT FROM THE BOOK Restructuring The Hottest Group In A Cooling Economy Whenever the economy starts sinking faster than the Titanic you start to hear about Restructuring and Distressed M A all the time Sure everyone else is getting fired but if you go work in one of those groups you re guaranteed a higher bonus even as the broader market sinks right Maybe maybe not so let s take a look at what you actually do in a Restructuring group how you break in and what you do next A Day in the Life So what do Restructuring bankers actually do and how does it differ from other what other investment bankers do The main difference is that Restructuring bankers work with distressed companies businesses that are either going bankrupt getting out of bankruptcy or in the midst of bankruptcy When a company s business suffers and it starts heading down the path of bankruptcy its creditors anyone that has lent it money whether banks hedge funds or other institutions immediately take notice A Restructuring group might be hired by a company to negotiate with its creditors and get the best deal possible usually in the form of forgiven debt Or they might advise a company on how best to restructure its current debt obligations either to get out of bankruptcy or to avoid it in the first place Another big difference is that Restructuring bankers must work within a legal framework the Bankruptcy Code and hence must have a more in depth legal understanding than other bankers Buy the book to read more CHAPTER OUTLINE Introduction Industry Groups vs Product Groups Got Exit Opps Mergers Acquisitions

**The International Handbook of Consultation in Educational Settings** Chryse Hatzichristou, Sylvia Rosenfield, 2017-03-16 The rapid changes in the composition of school age youth around the world have catalyzed a growing concern about how to address children's mental health and education. Grounded in this increasingly global perspective, *The International Handbook of Consultation in Educational Settings* is designed to provide a multicultural, transnational approach to consultation theory, research, training, and practice in educational settings. With chapters written by geographically diverse and prominent scholars across the field of school psychology, this handbook captures the range of ways in which consultation services are trained, implemented, and researched internationally. Written for practitioners, researchers, faculty members, and graduate students in the fields of school psychology, school counseling, special education, and educational psychology, this volume is the first of its kind to provide a comprehensive look at consultation in learning environments across the world. *The International Handbook of Consultation in Educational Settings* offers various perspectives on models, implementation, training, and research on school consultation. After an introduction to the volume by the editors, contributors to Part II examine school-based consultation around the world to explore how consultation services are implemented in different countries. Part III addresses cross-cultural issues in consultation, particularly at a systems level. Part IV presents themes related to processes and issues in the implementation of consultation by focusing on approaches in various countries. The chapters in Part V focus on consultation training, offering insights into the development of students and professionals into effective consultants in cross-cultural and systemic contexts. Part VI describes how practitioners can contribute to the body of research on consultation through careful planning and implementation of their work. Finally, the editors summarize key concepts and findings in a concluding chapter.

**Conflict of interests in high-tech investment advisory** Daniel Favoretto, 2024-02-21 What are the potential sources of conflict of interests in investment advisory services, and how should the law design legal tools of retail investor protection? These are the questions addressed by this book, which explores the new legal challenges of investor protection in the context of digital investment platforms and genAI advisors. The author analyses the investor protection tools provided by competition law, regulatory, and private law frameworks, taking Brazil as a case study where investment advisory experienced a unique market change and a major regulatory reform. This book addresses a worldwide audience and concludes with a set of policy recommendations.

[International Construction Law](#) Wolfgang Breyer, 2024-03-29 The construction industry routinely operates across international borders, which means that construction professionals need to have a good understanding of how legislation in different jurisdictions might affect their work. This book is an in-depth analysis of international construction law from all the major jurisdictions of the world, alongside their relevant contract law principles, helping the reader to prepare for the complexity of an international construction project. The book begins by introducing the major families of law before looking at individual jurisdictions. Each

chapter is written by an experienced legal professional operating in that region and covers subjects such as taking over defects liabilities warranties design issues termination bonds and guarantees limitation of liability and more The systems included are German civil system Germanic code French civil system Napoleonic code English common law system GCC countries civil law system with emphasis on UAE Qatar Saudi Arabia and Egypt Nordic legal system Chinese civil system Finally the book will discuss the national standard construction contracts used in the differing legal systems and the widely used FIDIC contracts The combination of truly international coverage with the practical insight of experienced practitioners means that this book will be invaluable to any professional involved in the construction industry including lawyers project managers contractors and investors as well as academics in the field

Finding, Freezing and Attaching Assets Jacob C. Jørgensen, 2016-03-21 Because of the rise in cross border disputes and due to the ease with which assets can be moved around the world with the help of online banking and fiduciary service providers parties are increasingly finding themselves suing or being sued outside their home jurisdictions This book is about how to find out whether a defendant has any assets before initiating costly litigation arbitration or insolvency proceedings and if so how to freeze such assets with the aim of eventually enforcing a judgment or award Nineteen country chapters by lawyers with decades of hands on experience in helping their clients find freeze and attach defendants assets provide practical guidance to legal professionals representing parties in cross border commercial lawsuits international arbitration proceedings simple debt collection matters enforcement proceedings divorce proceedings inheritance matters and other legal matters where the assets in dispute are thought to be located abroad Each contribution offers an overview of the pre trial asset tracing techniques and rules regulating freezing orders and enforcement methods in the jurisdiction covered describing not just what the law says but how the law actually works The jurisdictions covered include several of the offshore havens that are frequently used to hide assets in The authors attend to such issues and topics as the following investigating whether a potential counterparty owns vessels aircrafts motor vehicles real estate or intellectual property rights locating offshore trusts discovering assets transferred to a family member or corporate entity exposing sham investments designed to generate a fictitious loss of assets and invoking remedies available to a party facing asset shielding manoeuvres This book will quickly become an indispensable tool for international litigators arbitration lawyers and lawyers involved in cross border insolvency and debt recovery proceedings as well as for academics and scholars involved in legal research projects or law reform programs Renowned litigator Robert Shapiro says in his Foreword The authors provide the reader with practical guidance into the complex area of cross border asset tracing and do so in a very down to earth way without the academic hyperbole that generally burdens modern legal textbooks
