WHAT A PLANT KNOWS

"The reader will . . .
find enough absorbing
science to concede that plants
continue to inspire and amaze
us. It's time, as Joni Mitchell
sang at Woodstock, to get
ourselves back to the garden"
and take a closer look
at plants." —BILL LAWE,
The Wall Street Journal

human life through the placenta the bare interface of human skin and the porous materiality of soil Combining biology phenomenology Ancient Greek thought new materialisms environmental philosophy and affect studies Marjolein Oele thinks through the concrete living places that show the receptive responsive power of living beings to be affected and to affect She focuses on these localized interfaces to explain how affectivity emerges in places that are always evolving creative porous and fluid Every interface is material but is also more than its current materiality in cocreating place time and being After extensively describing the effects of the milieu and community within which each example of affectivity takes place in the final chapter Oele adds a prescriptive ethical lens that formulates a new epoch beyond the Anthropocene one that is sensitive to the larger ecological communal concerns at stake This is a very welcome contribution to environmental philosophy The strikingly original thesis is evident in the book s title what we call ecology is a co affectivity the mutuality of affecting and being affected on the part of species biological kingdoms ecosystems etc Here Marjolein Oele melds biology and ontology in new and creative ways enriching both fields Her book performs the very theme it explores it stages a co affective relation between philosophy and the life sciences Michael Marder author of *Plant Thinking A Philosophy of Vegetal Life* [What a Mushroom Lives For](#) Michael J. Hathaway,2023-11-07 How the prized matsutake mushroom is remaking human communities in China and providing new ways to understand human and more than human worlds *What a Mushroom Lives For* pushes today s mushroom renaissance in compelling new directions For centuries Western science has promoted a human and animal centric framework of what counts as action agency movement and behavior But as Michael Hathaway shows the world making capacities of mushrooms radically challenge this orthodoxy by revealing the lively dynamism of all forms of life The book tells the fascinating story of one particularly prized species the matsutake and the astonishing ways it is silently yet powerfully shaping worlds from the Tibetan plateau to the mushrooms final destination in Japan Many Tibetan and Yi people have dedicated their lives to picking and selling this mushroom a delicacy that drives a multibillion dollar global trade network and that still grows only in the wild despite scientists intensive efforts to cultivate it in urban labs But this is far from a simple story of humans exploiting a passive edible commodity Rather the book reveals the complex symbiotic ways that mushrooms plants humans and other animals interact It explores how the world looks to the mushrooms as well as to the people who have grown rich harvesting them A surprise filled journey into science and human culture this exciting and provocative book shows how fungi shape our planet and our lives in strange diverse and often unimaginable ways
