Properties of Matter

QUESTIONS

Are you able distinguish, how these questions are asked?

- Which one(s) among the following is/are physical property/properties?
- Which one(s) among the following is/are chemical property/properties?

What are Physical Properties?

Such as color, taste, smell, texture, boiling point etc. are called physical properties of the substance.

If physical properties of a substance are observed without changing the identity of the substance, observed the properties of an object without its identity. For example, you can identify an object's color, taste, smell, etc. without changing the properties of the object and distinguish it by the properties of the substance. The object remains the same.

Many of the physical properties of substances that make up objects are [chemical]. These properties include strength, hardness, magnetism, and the ability to conduct heat and electricity.

Some physical properties depend on how much of a material you have. In other words, a large amount of a material may have different properties than a smaller amount of the material. Other physical properties do not depend on how much of the substance you have. They show that no matter how large or small a sample of material is, the quality property is always the same.
