Chapter 3 Customer Relationship Management:

Customer Relationship Management SCN Education,2013-11-11 The rules change when the tools change Generating traffic to a website and catching the interest of the visitor in order to make him buy a product or a service is within everyone's reach today Intensive research try outs and the learning experience of E Commerce pioneers have helped to uncover the marketing sales possibilities of the Internet But now that we have customers visiting our site how do we keep them coming back How to get a clear profile of each customer so we can give him or her the service he's looking for And offer him other products he could also be interested in To achieve this companies are increasingly turning to Customer Relationship Management the concentration of sales marketing and service forces by integrating all dataflows into one data warehouse thus blending internal processes with technology The right way to market sell and service customers requires a different CRM strategy for every company Some organizations that reengineered their CRM processes are reporting revenue increases of up to 50% whereas others have had obtained minimal gains or no improvement at all The difference between the success or failure of a CRM project lies in the knowledge and ability that an organization brings to its efforts This Hon Guide defines CRM from different points of view sales marketing customer support and technology Customer Relationship Management V. Kumar,Werner J. Reinartz,2006 Customer relationship management CRM offers the potential of maximised profits for today's highly competitive businesses This title describes the methods and structures for integrating CRM principles into the workplace so that a strong customer relationship can be achieved *International E-Business - Building Online Customer Loyalty with Relationship Management* Wolfgang Katsch,2008-02 Diploma Thesis from the year 2001 in the subject Business economics Customer Relationship Management CRM grade very good University of Innsbruck Institute for Corporate Leadership language English abstract 1 1 Problem Statement For many years successful neighborhood merchants restaurants and pubs had real customer relationships They knew their customers personally understood what they wanted and as best they could satisfied their needs through personalized service As a result they earned loyalty and a large share of their customers business Some of the best examples of building customer loyalty can be found in those traditional small businesses Now the question arises how customer relationships can be built in the world of E Business E Business the buying and selling of products and services over the Web and its impact is comparable with the industrial revolution at the end of the last century After hysteric times of E Business startups and well known bursting bubbles the point of disillusion has come Some internet companies recognize that traditional business concepts are not necessarily outdated Acquiring customers on the international marketplace of E Business is enormously expensive and unless those customers stick around and make lots of repeat purchases over the years profit will remain uncertain For lasting success companies have to intensify their efforts towards customer loyalty and customer relationship management Without loyalty even the best designed E Business model will collapse This leads to the following objective 1 2 Objective The objectives of the thesis are to combine the concept of

customer loyalty with the characteristics of E Business show how companies can build loyalty with customer relationship management 1 3 Relevance of the Topic 1 3 1 Theoretical Relevance Concerning E Business there exists plenty of literature mainly from a technical point of view The drawback is that although loyal

The Role of CRM in Maximizing Customer Satisfaction Nashra Rafiq,2024-02-22 Seminar paper from the year 2020 in the subject Business economics Customer Relationship Management CRM grade A Coventry University Faculty of Social Sciences course Business Management and Marketing language English abstract Customer Relationship Management CRM has garnered substantial interest from both market practitioners and academic researchers due to the increasing competition and limited consumer base in today s globalized economy As products and services become more homogenized organizations seek innovative strategies to remain competitive often resorting to price reductions Concurrently empowered consumers with access to abundant information demand heightened levels of care from organizations shifting the balance of power towards the customer Consequently fostering strong customer relationships has emerged as a critical competitive advantage for organizations aiming for profitability The study s significance extends beyond organizational practices to contribute valuable insights to CRM literature and knowledge By examining the requirements and processes of CRM the research aims to inform stakeholders such as policymakers organizations researchers and academia about effective customer relationship management strategies Additionally the study aims to enrich the body of knowledge in related fields laying the groundwork for future research endeavors

Customer Retention as a Part of Customer Relationship Management of Private Broadcasting Radio Stations Maik Preßler,Christian Einicke,2008-02-07 Seminar paper from the year 2007 in the subject Business economics Customer Relationship Management CRM grade 1 7 Technical University of Ilmenau Institut f r Betriebswirtschaftslehre course Marketing Vertiefung language English abstract More and more companies realize the value a customer relationship management can deliver in a long term perspective Especially in the service market the relationship between customer and company is substantial for doing successful business This could be said for the private radio broadcasting companies too As they are part of the service market their success also depends essentially on relations Traditional channels as well as the upcoming possibilities of communication over the Internet offer new ways to interact and retain with customers The radio broadcaster s challenge is to identify the right channel for its customers This justifies the need for a structured way of implementing customer retention in private broadcasting companies We are convinced that this could be done through use of the strategic framework So in the following paper we examine the question How far can a strategic framework for CRM be used as a holistic approach to achieve customer retention in private broadcasting companies Therefore it is necessary to examine both the strategic framework and the private broadcasting radio companies in detail Afterwards the framework has to be adjusted to the features of the private roadcasting companies

Customer Card as a Tool for CRM in the German Textile Industry Claus Hombrecher,2019-02-08 Bachelor Thesis from the year 2016 in the subject Business economics General grade 2 0 University of Applied Sciences Essen language English abstract This thesis analyses the topic customer card in the context of CRM but with specific reference to the German Textile Industry According to history Henry Ford mentioned with the introduction of the Modell T in 1908 that every customer could choose the colour of the car by himself as long as the chosen colour was black He did that because black was easy to work with Because of the non existing competition during this time companies did not have to operate towards consumer needs and were able to focus on the goods they produced Mass marketing was developed to reach out for as many customers as possible to sell the maximum amount of goods In the late 1960s the quality of products became similar which changed the competitive situation Companies were forced to differentiate from each other by creating customer benefits Because of the rising variety consumers started asking for products fitting their needs New technology led to machines that were able to produce different

types of products and mass customizing was born To be able to individualize a product a lot of information concerning the customer needs to be collected This process is called customer integration Mass customizing has a one way communication from consumer to company To create a dialog relationship marketing was developed The aim was to build a long term relationship between company and customer so that both sides generate a benefit A rising profitability and a longer business relation were responsible for higher profits Research led to the result that it is about seven times cheaper to keep a customer than generating new ones According to further results an increase of 5% in customer relationship can enable a profit increase between 20% and 120% by cross and up selling actions Customer Relationship Management CRM describes this relationship process between a company and its customers During the time of the relationship customers are supposed to be bound to the company for as long as possible so that they will not migrate to a competitor Different CRM tools have been developed to achieve that goal A common one is the customer card program In Germany there are approximately up to 200 million customer cards in use at the moment

Selection of CRM software for the event sector Thomas Punzel, 2011-03-22 Master s Thesis from the year 2009 in the subject Business economics Offline Marketing and Online Marketing grade A 1 5 University of Birmingham University College Birmingham language English abstract This study was undertaken to recommend a suitable customer relationship management CRM software for the German event agency XYZ For this reason three different CRM software products were evaluated Four research objectives were established to achieve the aim They were the principles of customer relationship management the benefits and problems connected with the implementation of CRM the importance of measures to get loyal customers and a comparison of different software products with regard to different criteria Using the case study strategy including secondary research methods the researcher was able to answer the research objectives and the aim The main sources used in this investigation were secondary sources due to the large number of information available in these sources Prior the development of an assessment schematic was necessary to evaluate the credibility of these sources Personal experience with CRM the current importance of this topic and the gap in the event based literature motivated the researcher to undertake this study The findings indicated that the competitive environment in which small and medium enterprises operate make it necessary to implement a good working CRM system to identify potential customers who might become loyal Indeed a universal definition of terms such as CRM customer satisfaction and loyalty is missing or the terms are not clearly defined Findings also revealed that there is still a gap in literature concerning CRM within the event industry especially within event management companies The number of data concerning aspects such as competition and customer orientation regarding to event management companies is also rare or missing Beside these limitations research indicates that the market of CRM software products is growing Especially web based CRM solutions such as on demand software have become more popular in the last few years due to the mostly unproblematic implementation and the lower price of these products compared to traditional software packages

Recommendations for further research include a deeper analysis of CRM within the events industry and a clear definition of terms which are connected with CRM such as customer satisfaction and customer loyalty More information on customer orientation customer loyalty and competitiveness especially within event management companies would help to establish a more precise catalogue of software selection criteria
