## **Chapter 5 Critical Thinking Reading And Writing Pearson:**

**U.S. Army The Applied Critical Thinking Handbook** , Why Red Teaming The premise of the program at the University of Foreign Military and Cultural Studies UFMCS is that people and organizations court failure in predictable ways that they do so by degrees almost imperceptibly and that they do so according to their mindsets biases and experience which are formed in large part by their own culture and context The sources of these failures are simple observable and lamentably often repeated They are also preventable and that is the point of red teaming Our methods and education involve more than Socratic discussion and brainstorming We believe that good decision processes are essential to good outcomes To that end our curriculum is rich in divergent processes red teaming tools and liberating structures all aimed at decision support We educate people to develop a disposition of curiosity and help them become aware of biases and behavior that prevent them from real positive change in the ways they seek solutions and engage others We borrow techniques methods frameworks concepts and best practices from several sources and disciplines to create an education and practical applications that we find to be the best safeguard against individual and organizational tendencies toward biases errors in cognition and groupthink Red teaming is diagnostic preventative and corrective yet it is neither predictive or a solution Our goal is to be better prepared and less surprised in dealing with complexity What is Red Teaming Red teaming is a function that provides commanders an independent capability to fully explore alternatives in plans operations concepts organizations and capabilities in the context of the operational environment OE and from the perspectives of partners adversaries and others A Red Team performs three general types of tasks Support to operations planning and decision support Critical review and analysis of already existing plans Intelligence support Threat Emulation UFMCS provides education for the first two tasks TRADOC s Intelligence School and Center provides education on the third In order for a Red Team to effectively contribute to decision making all of the following elements are required The ability to think critically about the problem While this may seem obvious the reality is that critical thinking is a skill set that requires training education and tools The Army assimilates people from different backgrounds across the nation One of the drawbacks of that assimilation is our military tendency to reflect the same biases and perspectives We pride ourselves in common values which while ingrained in the Army culture are not universal outside of that culture Thinking critically and challenging the group is an unnatural act for military staffs Doing so effectively requires tools and methods that enable leaders to see different perspectives Red Teams require top cover to be allowed to challenge the conventional wisdom and the organization s leaders No matter the quality of the Red Team or the methods they employ dictatorial or toxic leaders are incompatible with successful red teaming Red teaming is not easy and not everyone can do it Red Teamers must be effective written and oral communicators They must have credibility in the area in which they are providing red teaming insights They must be able to constructively challenge the plan This means focusing on what is truly important able to explain why it is being challenged and offering some alternative ways to think about the

problem **Thinking Critically in College** Louis Newman,2023-03-07 Finally a college prep book that actually prepares students for college Almost all first year college students discover that college courses are more academically challenging than they expected and certainly harder than classes in high school Professors expect students not just to absorb material but to analyze and synthesize it consider multiple perspectives evaluate conflicting evidence and then apply what they've learned in new contexts Thinking Critically in College explains how to do all this and more Louis E Newman draws on decades of experience as a professor at Carleton College and Dean of Academic Advising and Associate Vice Provost for Undergraduate Education at Stanford offering the guidance you need to succeed both in college and in life post graduation Unique among college prep books Thinking Critically in College builds on the latest research in learning spells out the key critical thinking skills you need shows you how to tackle actual college assignments and provides exercises throughout to reinforce the lessons Written in a personal engaging style Thinking Critically in College explains how to do the work your professors will require exactly the preparation you need no matter what your academic background Practical accessible comprehensive and interactive Thinking Critically in College is the definitive guide not only for those in college or headed there but for everyone who needs a refresher on thinking clearly The Little Brown Workbook Donna Gorrell,2003-06
