The European Union and China Thomas Christiansen, Emil Kirchner, Uwe Wissenbach, 2018-12-12 This accessible text offers a comprehensive analysis of the European Union EU China relationship as one of the most important in global politics today Both are major players on the

world stage accounting for 30% of trade and nearly a quarter of the world's population. This text shows how despite many differences in political systems and values, China and the EU have developed such a close, regular set of interactions at multiple levels from political/strategic to economic and individual. The authors start with an historical overview of the domestic politics and foreign policy apparatus of each partner to show the context in which external relations are devised. From this foundation, each key dimension of the relationship is analysed: trade and monetary policy, security, culture and society. The authors show the relative merits of different theoretical perspectives and outline what is next for this complex, ever-changing relationship. At every step, the success of each partner in persuading the other of changing their positions for key strategic interests is explored. What emerges is a multifaceted picture of relations between two sides that are fundamentally different kinds of actors in the international system yet have many mutual interests and a common stake in the stability of global governance. The first major text to offer an accessible introduction to the multifaceted nature of EU-China relations, this book is an ideal companion for upper undergraduate and postgraduate students on Politics, International Relations and European Studies courses.

Chinese Foreign Relations Robert G. Sutter, 2020-10-30. With new assertiveness and prominence, China under President Xi Jinping is rightly considered an emerging and aggressive superpower backed by growing economic and impressive military strength. In this meticulous and balanced assessment, Robert G. Sutter traces China's actions under Xi Jinping, including the many challenges they pose to the international status quo. He provides a comprehensive analysis of newly prominent, Chinese unconventional levers of power and influence in foreign affairs that were previously disguised, hidden, denied or otherwise neglected or unappreciated by specialists. Sutter considers the domestic issues that preoccupy Beijing and the global factors—economic and political factors that complicate and constrain as well as enhance China's advance to international prominence.
