Management Zhaohan Sheng, 2017-10-20 Fundamental Theories of Mega Infrastructure Construction Management Theoretical Considerations from Chinese Practices is a collection of decades of research and applications of managing megaprojects using theories of complex systems and management sciences. It presents basic classical theory of megaproject management and is a showcase of more than 30 years of research of complex system and management sciences on the theory of megaproject management resulting from the integrating of theory and practice of megaprojects. The theory and models have undergone rigorous systematic testing during the management and implementation of megaprojects in China. Megaprojects are huge undertakings often in infrastructure bridges tunnels airports etc that involve huge levels of investment often take years to complete and typically run into delays cost overruns and any number of unforeseen problems. Over the last few decades no one country has undertaken more of these projects than China and this book presents the fundamental theories underlying the practice of Mega Infrastructure Construction Management as practiced in China. Individual chapters provide a basic definition of Mega Infrastructure Construction and its management an overview of the theories behind it the Formation Path basic concepts fundamental principles scientific problems the Method System of Meta synthesis specialized methods in research and intelligent management of Mega Infrastructure Construction. Although the theoretical construction management problems in this book are derived from construction practices in China they can be applied universally and extended for great fundamental significance.

The Construction Industry in the Fourth Industrial Revolution Clinton Aigbavboa, Wellington Thwala, 2019-08-09 This book gathers papers from the 11th Construction Industry Development Board cidb Postgraduate Research Conference held on 28-30 July 2019 in Johannesburg South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation. The event addressed three broad themes: Industrial production prefabrication 3D printing and assembly offsite and advanced manufacturing; Cyber physical systems actuators sensors IoT robots and cobots for repetitive and dangerous tasks and drones for mapping progress monitoring safety and quality inspections lifting moving and positioning; and Technologies digital ecosystems digital platforms BIM video and laser scanning AI and cloud computing big data and data analytics reality capture blockchain simulation virtual and augmented reality data standards and interoperability and vertical and horizontal integration. Given its scope the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction.

Sustaining the Future: Addressing Grand Challenges Through Megaprojects Edoardo Favari, Franca Cantoni, Marco Allena, Fabio Borghetti, Primiano Di Nauta, 2025-08-11 This book showcases the discussion about megaprojects carried out at the MeRIT Megaproject Research Interdisciplinary Team workshop 2024. The crisis discontinuity rising prices and supply chains disruption force radical reflection for those involved in megaprojects. It raises a

modern day challenge the creation of value for stakeholders Indeed the aim of the volume is to encourage readers to think more broadly articulately and less stringently than the mainstream claims There is a need to design implement and manage megaprojects by abandoning the old paradigm that leveraged solely on time and cost We need to move beyond that by going to explore the value generated the positive impact on people communities and territories Economic social and environmental sustainability takes on a new and broader articulation issues of the circular economy applied to megaprojects are addressed and ample space is ensured for the inclusion of social needs in current practices [Carbon neutrality approaches in buildings and agriculture sectors](#) Hongyun Si,Xianbo Zhao,Guangdong Wu,Ge Wang,2023-02-27 *Routledge Handbook on Labour in Construction and Human Settlements* Edmundo Werna,George Ofori,2023-12-12 *Routledge Handbook on Labour in Construction and Human Settlements* presents a detailed and comprehensive examination of the relationship between labour and the built environment and synergises these critical focus areas in innovative ways This unrivalled edited collection of chapters analyses problems and presents possible solutions related to the employment and conditions of workers in the construction industry It provides comprehensive coverage of the relationship between the global workforce and the built environment and is divided into four topical areas how labour and the built environment relate to development employment generation in the built environment quality of employment in the built environment and the impact of the built environment on labour in other sectors Underpinning the entire book is the premise that the way the built environment is produced and its main products buildings cities and towns have an impact on large numbers of workers At the same time the quality of the built environment requires construction workers who are well trained and with good working conditions While cities and towns are the engines of economic growth they will not be able to fulfil their economic potential if poverty in the workforce is not addressed Those who are unemployed underemployed or work in unfavourable conditions cannot fully contribute to production and at the same time are limited in their ability to purchase goods and services therefore limiting economic growth and restricting improvements in their living standards In addition investments in infrastructure housing and inner city redevelopment cannot be sustainable if labour issues i e poverty are not addressed This book aims at analysing this complex set of issues comprehensively and will be essential reading to a wide range of researchers across the interdisciplinary intersections of construction business and management economic development urban studies sociology political science and project management [BUiD Doctoral Research Conference 2024](#) Khalid Al Marri,Farzana Asad Mir,Ahmed Awad,Ahmed Abubakar,2025-05-16 This book presents selected contributions on a wide range of scientific and technological areas originating from the BUiD Doctoral Research Conference BDRC 2024 It discusses the following topics project management macroeconomic factors Fourth Industrial Revolution agility multiculturalism diversity inclusion leadership language discourse analysis curriculum critical thinking programming online learning and natural ventilation The contributions reflect the multifaceted nature of the research in three academic disciplines i e humanities formal science and
