Integrating Work in Theological Education Kathleen A. Cahalan, Edward Foley, Gordon S. Mikoski, 2017-03-09 If only we could do a better job of helping students at connecting the dots theological educators commonly lament Integration often proposed as a solution to the woes of professional education for ministry would help students integrate knowledge skills spirituality and integrity When these remain disconnected incompetence ensues and the cost runs high for churches denominations and ministers themselves However we fail in thinking that integrating work is for students alone It is a multifaceted constructive process of learning that is contextual reflective and dialogical It aims toward important ends competent leaders who can guide Christian communities today It entails rhythms not stages and dynamic movement including disintegration Integrating work is learning in motion across domains and among and between persons It is social and communal born of a life of learning together for faculty staff administrators and students It is work that bridges the long standing gaps between school ministry practice and life It s a verb not a noun Here a diverse group of theological educators through descriptive case studies theological reflection and theory building offer a distinctive contribution to understanding integrating work and how best to achieve it across three domains in community curriculums and courses

Failure Up Close Jay P. Greene, Michael Q. McShane, 2018-01-17 For many reasons failure in education reform is rarely admitted Even though it is incredibly hard work to try and improve the enormous and diverse American education system because there are political consequences of admitting that a particular effort did not live up to its promises and pressure from philanthropic funders to show success unsuccessful efforts are often swept under the rug or papered over with public relations efforts that avoid wrestling with the tough realities of educational improvement This doesn t help anyone As any educator will tell you failure is an essential part of learning Insofar as education reform needs to be a learning movement itself it has to be able to admit where it has failed and learn from it Failure Up Close engages a select group of scholars from across the ideological spectrum to examine

particular education reform efforts of recent years that have not succeeded and offer lessons for school and system improvement that can be learned from them Rather than view failure as negative this volume looks at failure as an opportunity to learn and grow In fact the editors endeavored to find authors that would analyze reforms for which they had some fundamental sympathy The goal is not to bash particular efforts or castigate their supporters but rather to help those supporters understand how to do what they do better and ultimately do better for children Yuk, Belajar dari Masalah!
