15th International Conference on Software Engineering, May 17-21, 1993, Baltimore, Maryland ,1993 **Structured Testing in Practice** Alfred Leithold,2008 Diploma Thesis from the year 2007 in the subject Information Management grade 2 Campus02 University of Applied Sciences Graz 31 entries in the bibliography language English abstract The IT market has been growing dramatically in the last 15 years Software tries to solve complex problems of the real world In addition customers expectations concerning the quality of the software are rising steadily Therefore testing the software before it is delivered to a customer is a necessity While testing software completely is impossible the test department must use techniques in order to test critical parts in the software first Furthermore the test department has to provide best possible information about the quality of the software achieved through passing several tests This requirement can be met only if testing is a structured and monitored process This thesis presents the implementation of an approach which understandsstructured software testing as an integrated part of the software development life cycle The approach is based

on several established models from software development quality assurance and software testing These models are discussed together with different commercial in house and Open Source tools used for the implementation of the approach A framework is described for automated test execution test results processing archiving of test data and web based test data management An example is given where this framework has been introduced to a software company Based on a specific quality approach the measurable quality improvement of the test process due to the introduction of the framework is presented
