Anderson,2019-11-20 As a trader you have to come up with various strategies in order for you to ensure that you do not make losses when buying and selling stocks You must be in a position to predict how the market will be in the near future This will give you an insight into whether you should invest your money in the stock market or not You will be required to analyze all the technical indicators in order for you to be able to tell whether the stock prices will go up or not The difference between day traders and swing traders is that the day traders monitor all the price movements in the stock in order for them to be able to tell whether they should buy or sell their stocks The swing traders are however never interested in the prices of the stocks at any given time This means that they can trade at any given time Their interest is the long term benefits they get from the stock market The swing trader will invest their money in a hurry and expect to get returns quickly They may be lucky to make profits at times but they may also be unlucky to make losses With swing trading one has to be a risk taker to indulge in it This means that they should be ready for loses even as they make profits However they can make sure that they know where their support comes from They should also be able to identify their resistance levels through the use of technical analysis This will be of great help in ensuring that they are excellent traders Most traders do not like swing trading This is because it is said to be riskier It is risky since the trader s interest is on the profits they make as they close the stocks This means that they can either make profits or losses since the market is not predictable They may find themselves getting shocked as a result of a change in the economy hence change in the prices in the market The interest rates would be too high which will make them get losses Who would want to be in a situation where they make losses after investing all their money in the stock market No one would want that to happen to them We all look forward to better days We want to make profits and expand reinvest again It is therefore important for one to ensure that they take their time before investing in the market in order for them to ensure that they minimize the chances of making losses In this book you will learn The Basics of Swing Trading Characteristics of a Swing Trader How to start Swing Trading The Difference between Investor and Trader Finding a Suitable Market Buying and Selling of Stocks Platform and Tools of Trading Fundamental and Technical Analysis Understanding Support and Resistance Levels Time and Money Management The mindset of a Successful Trader Goals Objectives Routine of a Swing Trader Would you like to Learn More Download this book Scroll to the top page and select buy now button [Swing Trading](#) Mark Stock,2019-07-13 Professional traders have lied to you forever Trading is not just a game for millionaires Even without a lot of capital and with just a small risk you can start trading and make huge amounts of money No this is not a dream it s a promise Don t you believe me Then keep reading The idea of being a day trader strikes fear into many people s heart That may be for a good reason becoming a day trader is a high risk venture and only a small proportion of people succeed at it But what if you could live the exciting life of a day trader with less pressure and far less risk It turns out you can We are talking about the intriguing and far less talked world of swing trading Swing trading lets you trade stocks without having a lot of upfront capital and with far lower risk Yet it gives you the tastes of being an active trader

that you crave In this book we will introduce you to the world of swing trading and show you how to get started Learn what swing trading is and how it differs from day trading and standard buy and hold investing Learn the psychology of professional traders change your mindset and learn how to think big Find out the right way to read stock charts and spot trends before anyone else does Get a quick and dirty education on candlesticks Learn all the secret ins and outs of technical indicators and demystify technical analysis Find out how to swing trade exchange traded funds for even more profits Learn the best way to select a brokerage Discover the top mistakes that new swing traders make and how to avoid them Swing trading is an exciting and more accessible world than you can imagine Find out how to get started today scroll the top of the page and select the BUY NOW button

**Swing Trading using the 4-hour chart 1-3** Heikin Ashi Trader, 2016-09-15

Swing trading is too fast for investors and too slow for day traders. It takes place on a timeframe in which you will find very few professional traders. Swing traders usually use 4-hour charts. This period falls exactly between that of the investor and the day trader. As a swing trader you are prone to sit on the fence and that's good because here you are almost alone. This book describes the swing trading method of the Heikin Ashi Trader. It is ideal for individual investors who do not want to sit all day in front of the computer screen.

Part 1: Introduction to Swing Trading  
1 Why Swing Trading  
2 Why should you trade using the 4-hour chart  
3 Which markets are suitable for swing trading  
4 What instruments you can swing trade  
5 Swing Trading Setups  
A Support and Resistance  
B double top and double bottom  
C breakouts  
D flags and pennants  
6 Money Management  
7 Why you need a Trading Diary  
8 What is it all about

Part 2: Trade the Fake

In the second part of the series **Swing Trading using the 4-hour chart** the Heikin

Ashi Trader speaks about the phenomenon of stop fishing and Fakeouts as well as the many deceptions that major players and algorithms stage in today's financial markets. These often seem more the rule than the exception.

- 1 A feint at its finest
- 2 How to identify fakes
- 3 How do I trade Fakes
- 4 Fakes at technical chart patterns A flags B triangles C Trend Channels
- 5 Trading cross rates
- 6 More complex patterns

Glossary Part 3 Where Do I Put My Stop

In the third part of the series on Swing Trading using the 4 hour chart the Heikin Ashi Trader treats the question on where the stop should be. Once a trader stops introducing stops he will discover that his hit rate will worsen. However by doing this he gains full control of the trade management. Stops are therefore not unavoidable but remain an integral part of a trading system that is profit oriented.
