Chapter 1 : Introduction

Q. 1 Write short notes on network topologies.

Dec. 10, May 11, May 12, Dec. 16, Dec. 17, May 18

Ans. :

The six basic network topologies are as shown in Fig. 1.1.

(C-140) Fig. 1.1 : Classification of network topology

These topologies can be classified into two types :

1. Peer to peer
2. Primary - secondary

Peer to peer is the relationship where the devices share the link equally. The examples are ring and mesh topologies.

In Primary - secondary relationship, one device controls and the other devices have to transmit through it. For example star and tree topology.

Note : An important point to be kept in mind is that the topology refers to the logical arrangement of the nodes (computers) and not the physical appearance. So sometimes a network which physically looks like a STAR may have a Bus topology when examined logically.

Switching :

- Switching is a technique of connecting computers (nodes) to a central node called switch. A switch can then be used to connect these nodes to the other nodes.
- Without switching we would need to connect every computer in the world to every other computer using separate wires. Practically it will not be possible to do due to the number of wires required to be used and the associated unreliability.

Q. 2 Explain the Bus topology with advantages and disadvantages.

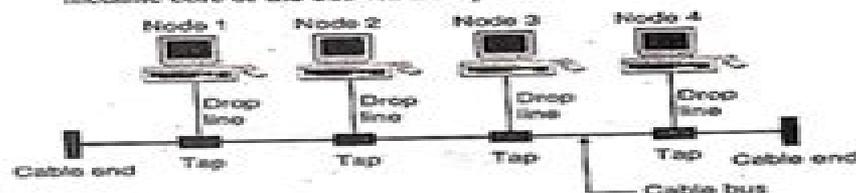

Dec. 10, May 12, Dec. 16, Dec. 17, May 18

Ans. :

Definition :

- The bus topology is a network topology in which nodes are directly connected to the common linear or branched half duplex link called as bus.

- The bus topology is usually used when a network under consideration is small, simple or temporary as shown in Fig. 1.2.
- On a typical bus network a simple cable is used without additional electronics to amplify the signal or pass it along from computer to computer. Therefore bus is a passive topology.
- This long cable called bus is used as backbone to all the nodes. The tap is connector that connects the node to the metallic core of the bus via a drop line.

(C-15) Fig. 1.2 : Bus topology

Working :

- When one computer sends a signal on the cable, all the computers on the network receive the information. However only the one with the address that matches with the destination address stored in the message accepts the information while all the others reject the message.
- The speed of the bus topology is slow because only one computer can send a message at a time. A computer must wait until the bus is free before it can transmit.
- The bus topology requires a proper termination at both the ends of the cable in order to avoid reflections.
- Since the bus is a passive topology, the electrical signal from a transmitting computer is free to travel over the entire length of the cable.
- Without termination when the signal reaches the end of the cable, it returns back and travels back on the cable.
- The transmitted waves and reflected waves, if they are in phase add and if they are out of phase cancel.
- Thus addition and cancellation of wave results in a standing wave.
- The standing waves can distort the normal signals which are travelling along the cable. This can be avoided by terminating the bus on both ends in 50 Ω load.
- The terminators absorb the electrical energy and avoid reflections.

Techmax Publications Easy Solution:

This book delves into Techmax Publications Easy Solution. Techmax Publications Easy Solution is a crucial topic that must be grasped by everyone, ranging from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Techmax Publications Easy Solution, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:

- Chapter 1: Introduction to Techmax Publications Easy Solution
- Chapter 2: Essential Elements of Techmax Publications Easy Solution
- Chapter 3: Techmax Publications Easy Solution in Everyday Life
- Chapter 4: Techmax Publications Easy Solution in Specific Contexts
- Chapter 5: Conclusion

2. In chapter 1, the author will provide an overview of Techmax Publications Easy Solution. The first chapter will explore what Techmax Publications Easy Solution is, why Techmax Publications Easy Solution is vital, and how to effectively learn about Techmax Publications Easy Solution.

3. In chapter 2, this book will delve into the foundational concepts of Techmax Publications Easy Solution. This chapter will elucidate the essential principles that need to be understood to grasp Techmax Publications Easy Solution in its entirety.

4. In chapter 3, the author will examine the practical applications of Techmax Publications Easy Solution in daily life. The third chapter will showcase real-world examples of how Techmax Publications Easy Solution can be effectively utilized in everyday scenarios.

5. In chapter 4, the author will scrutinize the relevance of Techmax Publications Easy Solution in specific contexts. This chapter will explore how Techmax Publications Easy Solution is applied in specialized fields, such as education, business, and technology.

6. In chapter 5, the author will draw a conclusion about Techmax Publications Easy Solution. This chapter will summarize the key points that have been discussed throughout the book.

This book is crafted in an easy-to-understand language and is complemented by engaging illustrations. This book is highly recommended for anyone seeking to gain a comprehensive understanding of Techmax Publications Easy Solution.
