Textbooks On Building Technology:

Construction Technology 2: Industrial and Commercial Building Mike Riley, Alison Cotgrave, 2018-02-20 Designed in a structured directed format to help develop understanding rather than just providing a simple source of information this popular undergraduate textbook offers comprehensive coverage of industrial and commercial building technology It builds on material in the first volume in the series Construction Technology 1 House Construction but it is also valuable as a standalone text The most student friendly textbook in the area it uses a wealth of features to reinforce understanding and test knowledge including case studies and comparative studies Case studies include photographs and commentary on specific aspects of the technology of framed buildings while comparative studies allow the reader to make a critical evaluation comparing and contrasting design details and solutions This textbook is aimed at undergraduates in Construction Management Quantity Surveying and Building Surveying and HNC D students in the same areas It is also ideal for associated Built Environment courses e g Land Management Civil Engineering where the basic technologies need to be understood New to this Edition Thoroughly revised throughout New material on sustainable construction incorporated as a key theme in each aspect of technology A new chapter on building services installations A new section of the highly topical subject of Building Information Modelling BIM Accompanying online resources for this title can be found at bloomsburyonlineresources.com

Construction Technology 2 3e These resources are designed to support teaching and learning when using this textbook and are available at no extra cost

Building Construction and Technology Vijayalaxmi J., 2023-07-24 This book highlights various aspects of building construction industry based on data from field studies It discusses the challenges methodologies technological applications in building construction technology and management The book presents new approaches to effective building construction and an understanding of the impact of applications of latest technologies This book is aimed at researchers and professionals in civil engineering and building engineering management to assist in understanding the domain along with recent applications the advantages and practical limitations through real life case studies This book is useful for building engineers in understanding the effective use of technology construction methods and project delivery systems

Basics Building Technology Bert Bielefeld, 2017 As building construction is becoming increasingly complex the field of building technology is becoming more and more important As an intermediary between all parties involved in a construction project the architect must be able to understand what is involved and to advise his clients This volume covers the fields of water supply and disposal electric installations and the energy related subjects i e heating ventilation and lighting The compendium combines the successful individual volumes Room Conditioning and Water Cycles and supplements these with the two hitherto unpublished volumes Electric Installation and Lighting design The student and architect are introduced to the basic principles terms and systems of building technology installations and equipment

Construction Technology R. Chudley, Roger Greeno, Simon Topliss, Mike Hurst, 2011 Construction Technology provides a comprehensive

introduction to every aspect of the technology of domestic low rise construction and principal associated legislation

Construction Technology Eric Fleming, 2009-02-12 This new textbook provides a comprehensive introduction to every aspect of the technology of low rise construction It includes sub structure site work setting out and foundations and superstructure flooring roofs finishes fittings and fixtures The material here covers the first year course requirement of all courses on which construction technology is taught no matter what the ultimate qualification It offers tried and tested solutions to a range of construction problems and is organised following the sequence of construction It will show what has been done in the past demonstrating good practice what works and what doesn't and common faults There are summaries of the more important BSI documents and reference to the latest building regulations Lengthy explanations are avoided by relying heavily on hundreds of illustrations pairing detail drawings with clear photographs to show real life construction situations The supporting spreadsheet referred to in the book can be found at this link http://www.blackwellpublishing.com/pdf/fleming_fleming_spreadsheet.xls

Construction Technology R. Chudley, 1987 The four volumes of *Construction Technology* provide a comprehensive guide to building technology from simple domestic single storey construction using traditional techniques to more complex multi storey construction using more modern industrialised techniques Each volume describes the technology concisely and is well illustrated with the author's own illustrations The series provides a basic knowledge of all building activities from basic methods of construction in the early volumes through to more complex topics such as site planning curtain walling and builders plant in later volumes The series concentrates on the technology and avoids lengthy descriptive passages leaving the description to the author's very detailed drawings Volume 3 along with volume 4 deals with modern or industrialised methods of construction and the construction of larger buildings It deals with the use of components which have been manufactured off site and more complex techniques than have been covered in volumes 1 and 2 The coverage of services is left to more specialised publications The book covers more complex site works such as deep excavations and tunnelling underpinning and piled foundations frameworks fire protection and escape cladding to framed structures factory buildings and formwork

Construction Technology Tony Bryan, 2015-09-14 The second edition of *Construction Technology Analysis and Choice* has been expanded to include commercial buildings This now covers in a single textbook all the basic forms of construction studied on professional courses The book takes as its theme the process of choice what the expert has to know and how he/she might think through the decisions to be made about the design production maintenance and disposal of buildings It is written with the conviction that by focusing on the process of choice the range of theory and knowledge that is useful to practice becomes explicit making the link between knowledge and practice and between understanding and experience The new edition has been updated throughout with extensive additions to Chapter 13 Manufacture and Assembly and to Chapter 15 Sustainability An entire new section has been added covering all the main elements of commercial construction Students will find here explanations of how environments structural behaviour

production know how cost and social concerns such as sustainability can be taken into account in the choice of construction. They will also gain a clear understanding of the construction details and specifications adopted for both housing and commercial buildings in the UK at the beginning of the 21st century. Provides a framework to think through proposed solutions. Sets the choice of solution in both time and place and in the context of sustainability. Focuses on key questions: will the proposal fail and can it be built? Considers a building's response to loading, environmental conditions and time. Looks at the production process as manufacture and assembly. Book website at www.wiley.com/go/bryanconstructiontech2e. Contains nearly 200 fully referenced clear line drawings to download for free as well as suggested learning activities for lecturers to incorporate into their teaching programmes.

Fundamental Building Technology Andrew J. Charlett, Craig Maybery-Thomas, 2007-01-24. All students undertaking Level One undergraduate programmes in construction need to develop an understanding of basic building techniques. This up to date and dependable textbook takes the reader through the essential skills, concepts and methods of constructing a simple house to provide a solid grounding in building techniques. Working through each element of a building project and incorporating practical considerations from materials selection to implementation, this is the ideal handbook for all students who need a hands on and thorough guide. Self assessment exercises at key points underline the main concepts and make this text ideal for distance or independent learners as well as university students.

Advances in Building Technology M. Anson, J.M. Ko, E.S.S. Lam, 2002-11-14. This set of proceedings is based on the International Conference on Advances in Building Technology in Hong Kong on 4-6 December 2002. The two volumes of proceedings contain 9 invited keynote papers, 72 papers delivered by 11 teams and 133 contributed papers from over 20 countries around the world. The papers cover a wide spectrum of topics across the three technology sub themes of structures and construction environment and information technology. The variety within these categories spans a width of topics and these proceedings provide readers with a good general overview of recent advances in building research.

Building Construction Handbook Roy Chudley, Roger Greeno, 2006-08-14. Building Construction Handbook provides extensive coverage of building construction practice processes and techniques representing established procedures as well as those associated with recent amendments to the Building Regulations, British and European Standards and other related references. This approach combined with the presentation of information in a highly illustrated and unique visual style has proven this text to be a vital learning resource for thousands of building construction students and an essential reference for professionals. The sixth edition has been updated and expanded to take into account many aspects of the new and revised Building Regulations and associated Approved Documents as applied to working practice in particular construction requirements for conserving and economising energy and reducing atmospheric pollution as this relates to Building Regulations Part L Conservation of fuel and power. This new edition also develops existing topics including adaptation of buildings to ensure compatibility for the disabled, further details of masonry construction, applications of steel reinforcement.

to concrete steel framed housing principles sound insulation and additional details of structural glazing Throughout reference to supplementary regulations and standards are provided for further reading and where appropriate design calculations are included Online lecture resources are provided with power point slides available for a selection of topics featuring essential illustrations for use with presentations and handouts The Handbook is an invaluable reference for students It consolidates several years of study material into one comprehensive volume suitable for a wide range of building and construction courses including NVQs in Construction and the Built Environment BTEC Nationals and Higher Nationals in Building Services Engineering Construction and Civil Engineering as well as construction related undergraduate degrees such as Built Environment Civil Engineering Building Surveying Construction Management Quantity Surveying Building Architectural Technology and Facilities Management and professional examinations Roger Greeno is a well known author of construction texts He has extensive practical and consultancy experience in the industry in addition to lecturing at several colleges of further and higher education and the University of Portsmouth He has also examined for City Guilds Edexcel the Chartered Institute of Building and the University of Reading Roy Chudley s books on Building Construction have helped thousands of students gain their qualifications and pass exams He was formerly a Senior Lecturer at Guildford College
