The Art-Architecture Complex Hal Foster, 2013-07-23 Hal Foster author of the acclaimed *Design and Crime* argues that a fusion of architecture and art is a defining feature of contemporary culture He identifies a global style of architecture as practiced by Norman Foster Richard Rogers and Renzo Piano analogous to the international style of Le Corbusier Gropius and Mies More than any art today s global style conveys both the dreams and delusions of modernity Foster demonstrates that a study of the art architecture complex provides invaluable insight into broader social and economic trajectories in urgent need of analysis

*Art-Architecture Complex* Hal Foster, 2013 A leading art theorist analyses the global style in art and architecture Hal Foster author of the acclaimed *Design and Crime* argues that a fusion of architecture and art is a defining feature of contemporary culture He identifies a global style of architecture as practiced by Norman Foster Richard Rogers and Renzo Piano analogous to the international style of Le Corbusier Gropius and Mies More than any art today s global style conveys both the dreams and delusions of modernity Foster demonstrates that a study of the art architecture complex provides invaluable insight into broad

**Counterpreservation** Daniela Sandler, 2016-12-15 In Berlin decrepit structures do not always denote urban blight Decayed buildings are incorporated into everyday life as residences exhibition spaces shops offices and as leisure space As nodes of public dialogue they serve as platforms for dissenting views about the future and past of Berlin In this book Daniela Sandler introduces the concept of counterpreservation as a way to understand this intentional appropriation of decrepitude The embrace of decay is a sign of Berlin s iconoclastic rebelliousness but it has also been incorporated into the mainstream economy of tourism and development as part of the city s countercultural cachet Sandler presents the possibilities and shortcomings of counterpreservation as a dynamic force in Berlin and as a potential concept for other cities Counterpreservation is part of Berlin s fabric in the city s famed Hausprojekte living projects such as the K pi Tuntenhaus and KA 86 in cultural centers such as the Haus Schwarzenberg the Schokoladen and the legendary now defunct Tacheles in memorials and museums and even in commerce and residences The appropriation of ruins is a way of carving out affordable spaces for housing work and cultural activities It is also a visual statement against gentrification and a complex representation of history with the marks of different periods the nineteenth century World War II postwar division unification on display for all to see Counterpreservation exemplifies an everyday urbanism in which citizens shape private and public

spaces with their own hands but it also influences more formal designs such as the Topography of Terror the Berlin Wall Memorial and Daniel Libeskind's unbuilt redevelopment proposal for a site peppered with ruins of Nazi barracks By featuring these examples Sandler questions conventional notions of architectural authorship and points toward the value of participatory environments

*What Images Do* Jan Backlund, Henrik Oxvig, Michael Renner, Martin Soberg, 2019-09-13 When images look like something they do so because they are different from what they resemble This difference is not sufficiently captured by the traditional theories of representation and mimesis and yet it is the condition for any such theory Various contemporary image theorists have pointed out that Plato already understood that images are not what they look like Images have their own existence which cannot be identified with a concept but should be examined in terms of actions This book comprises fifteen articles that investigate what images do particularly in relation to the disciplines of architecture design and visual arts It claims that it is the differentiating power of images their actions which constitutes their capacity to look like something they are not as well as create something that does not yet exist What Images Do addresses the crucial role that images might play in producing and investigating what we have not yet seen or understood in and of reality

**Cinema and Art as Archive** Aa. Vv., 2015-03-11T00:00:00+01:00 As Jacques Derrida wrote in 1995 while considering Archive Fever nothing is less reliable or less clear today than the word archive Nevertheless the historic cultural dimension of the contemporary discursive practices in cinema and art develops in the semantic openendedness of the term in the repositioning of the idea of archive The individual disciplines involved in one such field history of cinema and art theory of cinema and art aesthetics semiotics philology etc begin to open up to questioning the notion of archive even in negative in other words what after Michel Foucault the archive is not or does not seem to be The archive is not the library of libraries or encyclopedia it is not memory it is not museum it is not a database In recent years the attention focused on such ideas has not so much highlighted the impulses turns and specific forms of art art archive as it has revealed in many ways how the archive concerns us in the interrelation of aesthetic political ethical and legal levels among various disciplinary fields

**What Comes After Farce?** Hal Foster, 2024-10-22 Surveying the artistic and cultural scene in the era of Trump In a world where truth is cast in doubt and shame has gone missing what are artists and critics on the left to do How to demystify a political order that laughs away its own contradictions How to mock leaders who thrive on the absurd And why in any event offer more outrage to a media economy that feeds on the same Such questions are grist to the mill of Hal Foster who in What Comes after Farce delves into recent developments in art criticism and fiction under the current regime of war surveillance extreme inequality and media disruption Concerned first with the cultural politics of emergency since 9 11 including the use and abuse of trauma conspiracy and kitsch he moves on to consider the neoliberal makeover of aesthetic forms and art institutions during the same period A final section surveys signal transformations in art film and writing Among the phenomena explored are machine vision images produced by machines for other machines without a human interface operational images images that do not represent the world so much as intervene in it and the algorithmic scripting of information that pervades our everyday lives If all this sounds dire it is In many respects we look out on a world that has moved not only politically but also technologically beyond our control Yet Foster also sees possibility in the current debacle the possibility to pressure the cracks in this order to turn emergency into change
