Airport Development Reference Manual, 2022 **IATA Airport Development Reference Manual** International Air Transport Association, 1995 [Airport Passenger Terminal Planning and Design](#) Landrum & Brown, 2010 TRB's Airport Cooperative Research Program ACRP Report 25 Airport Passenger Terminal Planning and Design comprises a guidebook spreadsheet models and a user's guide in two volumes and a CD ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides in a single reference document the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals Volume 1 addresses the airside terminal building and landside components of the terminal complex Volume 2 of ACRP Report 25 consists of a CD ROM containing 11 spreadsheet models which include practical learning exercises and several airport specific sample data sets to assist users in determining appropriate model inputs for their situations and a user's guide to assist the user in the correct use of each model The models on the CD ROM include such aspects of terminal planning as design hour determination gate demand check in and passenger and baggage screening which require complex analyses to support planning decisions The CD ROM is also available for download from TRB's website as an ISO image [A Decision-Makers Guide to Public Private Partnerships in Airports](#) Andy Ricover, Jeffrey Delmon, 2019-12-06 Airport development is critical to economic growth and poverty reduction This book will help decision makers assess whether Public Private Partnerships PPP might be a viable option to meet their airport development requirements It walks the reader through the airport PPP process from early preparation to bringing the project to market and managing the project during implementation The book will help eradicate misconceptions about the role of the private sector in airport infrastructure A Decision Makers Guide to Public Private Partnerships in Airports provides an essential guide for those in a position to make decisions linked to airport development to their advisers their staff and also to students wishing to understand airport PPP *International Aviation Law for Aerodrome Planning* Chehab Salih, 2020-11-03 The objective of this book is to provide ICAO States competent authorities and aerodrome operators with a comprehensive overview of legal challenges related to international aerodrome planning Answers to derived legal questions as well as recommendations thereafter shall help to enhance regulatory systems and to establish a safer aerodrome environment worldwide Compliant aerodrome planning has an immense impact on the safety of passengers personnel aircraft and of course the airport Achieving a high safety standard is crucial as many incidents and accidents in aviation happen at or in the vicinity of airports Currently more than 40% of the ICAO Member States do not fully comply with international legal requirements for aerodrome planning Representatives of ICAO and States as well as aerodrome and authority personnel will understand why compliance with the different legal facets of aerodrome planning is challenging and learn how shortcomings

can be solved *Foundations of Airport Economics and Finance* Hans-Arthur Vogel,2019-03-21 *Foundations of Airport Economics and Finance* analyzes the impact key economic indicators play on an airport's financial performance. As rapidly changing dynamics including liberalization, commercialization, and globalization are changing the nature of airports worldwide, this book presents the significant challenges facing current and future airports. Airports are evolving from quasi-monopolies to commercial companies operating in a global environment with ever-increasing passenger and cargo volumes and escalating security costs that put a greater strain on airport systems. This book highlights the critical changes that airports are experiencing, providing a basic understanding of both the economic and financial aspects of the air transport industry. It identifies the economic roots of airport financial performance and how the interplay of its major parameters affects profitability. It bridges the gap between the latest airport academic research and real-world airport financial management. It covers cases and scenarios of numerous airports from around the world. Includes learning aids such as chapter introductions and summaries, glossary, and appendices.

Aerodrome Governance in Asia Sandeepa Bhat B.,2025-09-26 This book disseminates valuable information from both legal and managerial sides related to airport governance in Asia. With the expansion of existing airports and construction of new airports, legal and managerial aspects have become most significant for different stakeholders. Recognizing the continuous rising importance of the sector, aviation law and management courses are also being offered across the globe. The book caters to the needs of a wide spectrum of readers, including scholars, researchers, and students of law, aviation management, international relations, and related fields; policymakers, regulators, and government officials who are involved in regulating, managing, and developing aerodromes in Asian countries; and professionals in the aviation industry, including airport operators, airlines, aviation consultants, and legal practitioners.

Aviation Investment Doramas Jorge-Calderón,2020-12-28 *Aviation Investment* uniquely addresses investment appraisal methods across the key industries that make up the aviation sector, including airports, air traffic management, airline, and aircraft manufacturing or aeronautic industries. This practice-oriented book presents methods through realistic case studies. It covers both economic appraisal or cost-benefit analysis, measuring the value of projects to society, and financial appraisal, valuing projects as cash generators. This substantially expanded second edition covers in greater detail the treatment of environmental emissions, paying particular attention to climate change. It addresses the treatment of Market-Based Mechanisms (MBMs) including cap and trade systems like ETS and offset systems like CORSIA and compares them to environmental taxes. It also addresses the adjustments needed to measure the foreign exchange-generating value of projects relevant in the presence of trade barriers. The new edition includes two new project types: One is airport relocations, perhaps the most complex type of airport projects where the economic case is often more nuanced than may be apparent. The second is the re-introduction of supersonic travel. *Aviation Investment* offers all aviation sub-sectors a single source reference, bringing together the theoretical background of the economic appraisal literature and aviation investment in practice. It is

written in a style that is accessible to non academic professionals using formulae only where strictly necessary to enable practical applications and benefits from the substantial practical experience of the author
