Soviet Ballistic Missile Defense and the Western Alliance David Scott Yost, 1988 Yost suggests that the challenges for Western

policy posed by Soviet ballistic missile defense BMD programs stem partly from Soviet military programs Soviet arms control policies and Soviet public diplomacy campaigns and partly from the West's own intra-alliance disagreements and lack of consensus about Western security requirements

Ballistic Missile Defense Ashton B. Carter, David N. Schwartz, 2010-12-01 Defense against nuclear attack so natural and seemingly so compelling a goal has provoked debate for at least twenty years Ballistic missile defense systems formerly called antiballistic missile systems offer the prospect of remedying both superpowers' alarming vulnerability to nuclear weapons by technological rather than political means But whether ballistic missile defenses can be made to work and whether it is wise to build them remain controversial The U S Soviet Anti Ballistic Missile Treaty of 1972 restricts testing and deployment of ballistic missile defenses but has not prohibited more than a decade of research and development on both sides As exotic new proposals are put forward for space based directed energy systems questions about the effectiveness and wisdom of missile defense have again become central to the national debate on defense policy This study jointly sponsored by the Brookings Institution and the Massachusetts Institute of Technology examines the strategic technological and political issues raised by ballistic missile defense Eight contributors take an analytical approach to their areas of expertise which include the relationship of missile defense to nuclear strategy the nature and potential applications of current and future technologies the views on missile defense in the Soviet Union and among the smaller nuclear powers the meaning of the Anti Ballistic Missile Treaty for today's technology and the present role and historical legacy of ballistic missile defense in the context of East West relations The volume editors give a comprehensive introduction to this wide range of subjects and an assessment of future prospects In the final chapter nine knowledgeable observers offer their varied personal views on the ballistic missile defense question

[Strategic Thinking, Deterrence and the US Ballistic Missile Defense Project](#) Reuben Steff, 2016-04-01 A systematic critical survey of American strategic thinking and the strategic culture in which it is formed In particular this book seeks to interrogate the theory and

strategy of nuclear deterrence and its relationship to the concept of missile defence Drawing widely on the theoretical literature in international relations and strategic studies it identifies the key groups that have competed over America's nuclear policy post 1945 and examines how the concept of missile defence went through a process of gestation and intellectual contestation leading to its eventual legitimization in the late 1990s Steff sheds light on the individuals groups institutions and processes that led to the decision by the Bush administration to deploy a national missile defence shield Additionally Steff systematically examines the impact deployment had on the calculations of Russia and China In the process he explains that their reactions under the Bush administration have continued into the Obama era revealing that a new great power security dilemma has broken out This Steff shows has led to a decline in great power relations as a consequence

Ballistic Missile Defense In The Post-cold War Era David B H Denoon, 2021-11-28 With the end of the Cold War and the visibility of U S Patriot missile defenses during the 1991 Gulf War the cost and benefits of ballistic missile defense systems BMD need to be re-evaluated In this detailed and balanced study David Denoon assesses new types of short range and intercontinental missile defenses In the post Cold War era two fundamental changes have made missile defense for the United States and its military forces more compelling The United States and Russia no longer see each other as direct threats and there has been a dramatic proliferation of ballistic missile capability in the Third World Consequently U S forces deployed overseas are more likely to be at risk and eventually the United States itself could become vulnerable to missile threats With these changes in mind David Denoon analyzes the current BMD dilemma arguing that active defenses against missiles should be seen as a form of insurance against catastrophe He assesses the likelihood of missile attacks and the appropriate level of investment

for the United States to defend against such attacks The book provides an assessment of deterrence and the performance of the Patriot missiles during the 1991 Gulf War critiques the Strategic Defense Initiative and analyzes the prospects for new types of short range and intercontinental missile defenses Regional Ballistic Missile Defense in the Context of Strategic Stability Russian Academy of Sciences,National Academy of Sciences,Policy and Global Affairs,Committee on International Security and Arms Control,Joint Committee on Ballistic Missile Defense in the Context of Strategic Stability,2019-12-13 As ballistic missile technology proliferates and as ballistic missile defenses are deployed by both the Russian Federation and the United States it is increasingly important for these two countries to seek ways to reap the benefits of systems that can protect their own national security interests against limited missile attacks from third countries without undermining the strategic balance that the two governments maintain to ensure stability Regional Ballistic Missile Defense in the Context of Strategic Stability examines both the technical implications of planned missile defense deployments for Russian and U S strategic deterrents and the benefits and disadvantages of a range of options for cooperation on missile defense *Strategic Defences in the 1990's* Ivo H. Daalder,1991-06-18 Examines the value of deploying strategic missile defences to counter the threat of nuclear accidents It concludes that the deployment of strategic defences in the 1990s will not be strategically desirable technically feasible or economically affordable **The Emerging Shield** Kenneth Schaffel,1991 Defense 101 Michael E.
