Bangladeshi women's experiences and vulnerabilities in Jordan's garment sector Nassif, Gabriella, Bhuiyan, Muhammad Mahbubul, Zahir, Md, Abdulrahim, Sawsan, Ringler, Claudia, 2023-06-06 Jordan's garment sector employs a large number of women migrants from South Asia who face various challenges and vulnerabilities in their work environment. The COVID-19 pandemic has further exacerbated some of these vulnerabilities leading to income losses. However, little information is available about this migration corridor. This study implemented qualitative phone survey interviews with returnee women migrants in Bangladesh to identify interventions that the organizations such as the International Labor Organization and other actors supporting women's safe migration could undertake to reduce women's vulnerabilities in migration. The study identified networks of discipline and power, the perception of appropriate behavior at work and beyond, and racialization as key areas that mediate vulnerabilities of women. We recommend increasing awareness of conditions at Jordan's garment sector as part of pre-departure training which is supported by the main recruitment practice of garment workers through BOESL in the country. Awareness raising includes information on the role of the Al Hassan Workers Center as well as on the role of the embassy of Bangladesh in Jordan. A second recommendation is to translate contractual documents into Bengali so that women migrants can better understand work conditions including salaries. The final recommendation focuses on the need to continue research on the uneven power dynamics in Jordan's garment sector to support dismantling networks of discrimination and power and racialization of the work environment.

Internal Communication in Bangladeshi Ready-Made Garment Factories Helene Blumer, 2015-12-07 By drawing up a model of the internal communication system of Bangladeshi ready-made garment factories, Helene Blumer identifies the existence and intensity of its communication flows. She furthermore discloses a connection from this communication system to labor unrest. The absence of a functioning formal channel within the factory, the lack of effective labor representation, and the rare physical presence of the factory owners confirm the existence of a communication barrier. As a symptom of a flawed communication system, this barrier confirms a connection to labor unrest and the management's unawareness of its emergence, which would thwart any modes to predict and prevent work disruptions.

The Bangladeshi Diaspora in Malaysia Nayeem Sultana, 2009 The study explores the organizational structure, modes of networking, and the survival strategies of Bangladeshi migrants in Malaysia. Looking at the very diverse social reality, differentiation, and power dimensions within the community, this study will facilitate our understanding of the Bangladeshi Diaspora in selected multi-cultural social settings of Kuala Lumpur, Penang, and Johor Bahru.
