**Basic Business Statistics** Dean P. Foster, Robert A. Stine, Richard P. Waterman, 2001-06-27. Preface: Statistics is seldom the most eagerly anticipated course of a business student. It typically has the reputation of being a boring, complicated, and confusing mix of mathematical formulas and computers. Our goal in writing this casebook and the companion volume *Business Analysis Using Regression* was to change that impression by showing how statistics yields insights and answers interesting business questions. Rather than dwell on underlying formulas, we show how to use statistics to answer questions. Each case study begins with a business question and concludes with an answer to that question. Formulas appear only as needed to address the questions, and we focus on the insights into the problem provided by the mathematics. The mathematics serves a purpose. The material in this

casebook is organized into 11 classes of related case studies that develop a single key idea of statistics The analysis of data using statistics is seldom very straightforward and each analysis has many nuances Part of the appeal of statistics is this richness this blending of substantive theories and mathematics For newcomers however this blend is too rich and they are easily overwhelmed and unable to sort out the important ideas from nuances Although later cases in these notes suggest this complexity we do not begin that way **Paperbound Books in Print** ,1992 **Basic Business Statistics** Mark Berenson,David Levine,Kathryn Szabat,Judith Watson,Nicola Jayne,Martin O'Brien,2018-10-12 This fifth Australasian and Pacific edition of Basic Business Statistics Concepts and Applications continues to build on the strengths of the fourth edition and extends the teaching foundation of the previous American editions While the teaching philosophy of this text is based upon the principles of the American book each chapter has been carefully revised to include practical examples and a language and style that is more applicable to Australasian and Pacific readers Academics are given the flexibility of designing an engaging unit for a mixed cohort of students with courseware that drives technical and soft skills through authentic learning tools and assignments for hybrid online and face to face units Additionally this product Has respected and updated current content Can be used across First Year and Introductory units in all undergraduate Maths or Business courses
