Predictive Policing in Germany. Opportunities and challenges of data-analytical forecasting technology in order to prevent crime Vanessa Bauer,2020-01-08 Master s Thesis from the year 2019 in the subject Computer Science Theory grade A Management Center Innsbruck language English abstract This Master Thesis introduces theoretical fundamentals of Predictive Policing tools used in German police institutions such as Hot Spot techniques Near Repeat approaches Risk terrain Analysis and Concentric Zone Model In times of Big Data police work has also changed and the usage of forecasting technologies in order to prevent crime does not only vary state wide in definitions but also in its application Therefore objectives and appliances are described in general Additionally a chronological transformation is established in order to compare lineages in Germany with those in the USA Since Predictive Policing polarises the research question deals with potential opportunities and challenges police institutions and the society have to deal with when it comes to leveraging data analytical forecasting technologies in order to prevent crime The motivation for writing the Master Thesis about the present topic stems from the fact that it is highly current and has not yet been thoroughly studied Preventing crime and thus ensuring a safe environment is an important field of research in our society and should be guaranteed with problem oriented policing Since there are varying considerations and application measures of PP according to different country side frameworks the Thesis provides an overview about technical functioning and practical appliance within Germany Therefore content provides on the one hand added value for lecturers and students in the field of Public Security Management and related studies or police officers in the upper grade of the civil service On the other hand it serves to educate citizens about how far the technologies have progressed in this area and to what extent this will influence the lives of citizens in the future Many police departments worldwide test software based forecasting technologies according to their relevance in practice Forecasting systems work with data sets about already registered crime activities Those datasets are then complemented with socio spatial calendar and meteorological data Since the amount of collected and analyzed data increases day by day the question arises as to what extent Machine Learning and Artificial Intelligence will influence the human advice origin to predict and prevent crime *Information and Communication Technologies in Education, Research, and Industrial Applications* Vadim Ermolayev,Heinrich C. Mayr,Mykola Nikitchenko,Aleksander Spivakovsky,Grygoriy Zholtkevych,2014-11-27 This book constitutes the thoroughly refereed proceedings of the 10th International Conference on Information and Communication Technologies in Education Research and Industrial Applications held in Kherson Ukraine in June 2014 The 16 revised full papers presented were carefully reviewed and selected from 66 submissions The papers are organized in topical sections on framework and tools information and communication technologies in teaching and learning information and communication technologies in research and industrial applications New Paradigm in Decision Science and Management Srikanta Patnaik,Andrew W. H. Ip,Madjid Tavana,Vipul Jain,2019-09-20 This book discusses an emerging

area in computer science IT and management i e decision sciences and management It includes studies that employ various computing techniques like machine learning to generate insights from huge amounts of available data and which explore decision making for cross platforms that contain heterogeneous data associated with complex assets leadership and team coordination It also reveals the advantages of using decision sciences with management oriented problems The book includes a selection of the best papers presented at the International Conference on Decision Science and Management 2018 ICDSM 2018 held at the Interscience Institute of Management and Technology IIMT Bhubaneswar India Top 10 Challenges of Big Data Analytics Maria José Sousa,Manuel Au-Yong Oliveira,2021 The application of big data analytics in all fields of research is a critical driver for the competitiveness of all countries in the modern world Currently governments and industry generate large amounts of data driven by record keeping compliance regulations data privacy and dynamic requirements and thus there is a need to create better mechanisms to analyse data and hence support organizational development as well as providing aid to policymakers decision making processes In this context there are emerging disruptive opportunities because of Big Data new business models and vertical industry segments will emerge through shared relationships with all the stakeholders and big data analytics is a major asset to support these dynamic relationships This book was developed with the objective of analysing some of those challenges while at the same time providing a perspective of the potential of big data analytics and the importance that analytics have for managers and for policymakers to help define new strategies and new public policies respectively The book is focused on different sectors of activity i e the Health sector Public Administration the Education sector among others and on different economic dimensions i e Entrepreneurship and Innovation and links big data analytics to different fields of research such as artificial intelligence and other emergent technologies which are challenging organisations governments and societies with the need to face the new imperative of being prepared for the very uncertain and tremendously complex future in which big data analytics will play a very decisive and active role Harness the Power of Big Data The IBM Big Data Platform Paul Zikopoulos,Dirk deRoos,Krishnan Parasuraman,Thomas Deutsch,James Giles,David Corrigan,2012-11-08 Boost your Big Data IQ Gain insight into how to govern and consume IBM s unique in motion and at rest Big Data analytic capabilities Big Data represents a new era of computing an inflection point of opportunity where data in any format may be explored and utilized for breakthrough insights whether that data is in place in motion or at rest IBM is uniquely positioned to help clients navigate this transformation This book reveals how IBM is infusing open source Big Data technologies with IBM innovation that manifest in a platform capable of changing the game The four defining characteristics of Big Data volume variety velocity and veracity are discussed You ll understand how IBM is fully committed to Hadoop and integrating it into the enterprise Hear about how organizations are taking inventories of their existing Big Data assets with search capabilities that help organizations discover what they could already know and extend their reach into new data territories for unprecedented model accuracy and discovery In this book

you will also learn not just about the technologies that make up the IBM Big Data platform but when to leverage its purpose built engines for analytics on data in motion and data at rest And you ll gain an understanding of how and when to govern Big Data and how IBM s industry leading InfoSphere integration and governance portfolio helps you understand govern and effectively utilize Big Data Industry use cases are also included in this practical guide *Big Data* Jie Gong, Kevin Patrick Heaslip, Farbod Farzan, Susan A. Brink, Sue McNeil, 2016 State Departments of Transportation and other transportation agencies collect vast quantities of data but managing accessing and sharing data has been problematic and well documented This project reviewed the similar challenges faced by other industries and investigated what approaches have been taken by these industries to address those challenges In the project we also explored what kinds of data sets in the transportation industry are posing big data challenges and reviewed relevant studies on emerging applications of these data sets It is reasonable to conclude that the rise of big data demands more efficient and effective and scalable data analysis methods that must transcend traditional analysis methods in the field of statistics data mining and machine learning Therefore a detailed literature survey was also conducted on what kind of tools and data analytics have been proposed and used for big data analytics Many use cases are highlighted in the report to demonstrate the opportunities with big data At the end of the project a half day workshop was conducted to disseminate the findings of this research and solicit inputs from leading industry and academic researcher in the field of engineering informatics cloud computing and big data analytics Many presentations in the workshop have echoed the findings of this project *Data Analytics and The Internet of Things* Ajit Singh, 2019-05-27 Research Paper postgraduate from the year 2018 in the subject Computer Science Internet New Technologies grade 8 78 course MCA language English abstract Development of big data and IoT is rapidly increasingly and affecting all the major technologies and the business by increasing the benefits for the individual and organisations The increasing growth of data of IoT devices has played a major role for use of Big Data Big data is categorize into three aspects a Variety b Volume c Velocity These categories are introduced by Gartner to describe the elements of big data challenges Various opportunities are presented by the capability to analyze and utilize huge amounts of IoT data including applications in smart cities smart transport and grid systems energy smart meters and remote patient healthcare monitoring devices The more popularity of Internet of Things day by day has made a big data analytics challenging because of the processing and collection of data through different sensors in the IoT network The data are totally different from normal big data collected through systems in terms of characteristics because of the various sensors and objects involved during data collection which include heterogeneity noise variety and rapid growth *Data Science and Big Data Analytics* EMC Education Services, 2015-01-27 Data Science and Big Data Analytics is about harnessing the power of data for new insights The book covers the breadth of activities and methods and tools that Data Scientists use The content focuses on concepts principles and practical applications that are applicable to any industry and technology environment and the learning is supported and
