

High Biobased Carbon Content Polyurethane Dispersions Synthesized from Fatty Acid-Based Isocyanate

Cheng Zhang, Haoran Wang,[✉] Weixiu Zeng, and Qixin Zhou[✉]

National Center for Education and Research on Corrosion and Materials Performance, Department of Chemical and Biomolecular Engineering, The University of Akron, 264 Wolf Ledges Parkway, Akron, Ohio 44325, United States

ABSTRACT: A series of high biobased carbon content polyurethane dispersions (PUD) was successfully synthesized from dimer fatty acid diisocyanate (DDI), castor oil (CO), alkoxysilane-modified castor oil (MCO), and dimethylolpropionic acid (DMIPA). This work focused on the improvement for the final performance of the renewable DDI-based PUD as well as the discussion of structure/property relationships. The chemical structure of MCO and Si–O–Si cross-link network structure on the dry-film of PUD were characterized by Fourier-transform infrared spectroscopy (FTIR) and solid-state ²⁹Si NMR. The effect of alkoxysilane and NCO/OH ratio on DDI-based PUD were investigated by differential scanning calorimetry (DSC), thermogravimetric analysis (TGA), tensile tests, and electrochemical impedance spectroscopy (EIS). The glass transition temperature, Young's modulus, and tensile strength increased with the incorporation of alkoxysilane and increasing NCO/OH ratio. In the meanwhile, the initial degradation temperature and elongation at break were reduced with increasing content of alkoxysilane. Finally, the alkoxysilane-modified DDI-based PUD exhibited excellent corrosion resistance after the immersion in NaCl solution for 28 days. In general, the present research suggested that through appropriate modification the DDI-based PUD with high biobased carbon content could exhibit great mechanical properties and excellent anticorrosion properties.

INTRODUCTION

Polyurethane dispersions (PUD) belong to the polyurethane polymer systems which are dispersed in water. They are usually synthesized from polyols, isocyanates, and the dispersing-function monomers. PUD have received extensive attention from industry and academia once they were invented. After years of research and development, PUD have become one of the most important materials in the coatings and adhesives industry due to their nontoxicity and safety.¹ Nowadays, several novel types of PUD have been developed, such as 2K polyurethanes dispersions and nonisocyanate polyurethane dispersions.^{2–4} In the next few years, the usage of PUD coatings with water as a solvent is likely to rise rapidly as the concepts of environmentally friendly development become more popular. However, compared with conventional solvent-based polyurethane coatings, there is still a need for the enhancement of biobased PUD coatings properties, such as corrosion resistance and adhesion.

Over the years, biobased materials technology has been growing rapidly. Biobased materials, especially vegetable oil-based materials, are considered potential alternatives to conventional petroleum-based materials for the future.⁵ For example, the biobased materials, such as vegetable oil-derived polyols, have been widely applied in coatings, plastic films, lubricants, rubbers, and many other intermediate products.^{6–12} Multiple synthesis methods for vegetable oil-based polyols have been investigated including epoxidation and ring opening,

transesterification and amidation, ozonolysis and reduction, hydroformylation and reduction, and thiol–ene reaction.¹³ Although some of the petroleum-based products could be replaced by biobased materials, many important petroleum-based materials rarely have suitable alternatives for real application, such as isocyanates and amines. Therefore, for sustainable development it is significant to continuously study alternatives to petroleum-based materials.

In recent years, much attention has been drawn to the application of dimer fatty acid-derived isocyanate as a potential alternative to petroleum-based isocyanate.^{14–16} 2-Heptyl-3,4-bis(9-isocyanatononyl)-1-pentylcyclohexane (DDI) is a special aliphatic diisocyanate derived from dimer fatty acid with two branched long chains connected on the cyclic aliphatic unit. It exhibits excellent flexibility, low water sensitivity, outstanding water resistance, nonyellowing performance, low toxicity, and low viscosity. Calvo-Correas reported that the thermoplastic polyurethane synthesized from DDI showed a low glass transition temperature because the branched structure of DDI could reduce the degree of crystallization.¹⁷ Chaoen developed a biobased polyurethane elastomer from DDI and biobased macrodiols with 700% of elongation at break and 40 MPa of

Biobased Materials For Polyurethane Dispersions Introduction

Biobased Materials For Polyurethane Dispersions Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Biobased Materials For Polyurethane Dispersions Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Biobased Materials For Polyurethane Dispersions : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Biobased Materials For Polyurethane Dispersions : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Biobased Materials For Polyurethane Dispersions Offers a diverse range of free eBooks across various genres. Biobased Materials For Polyurethane Dispersions Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Biobased Materials For Polyurethane Dispersions Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Biobased Materials For Polyurethane Dispersions, especially related to Biobased Materials For Polyurethane Dispersions, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Biobased Materials For Polyurethane Dispersions, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Biobased Materials For Polyurethane Dispersions books or magazines might include. Look for these in online stores or libraries. Remember that while Biobased Materials For Polyurethane Dispersions, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Biobased Materials For Polyurethane Dispersions eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Biobased Materials For Polyurethane Dispersions full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Biobased Materials For Polyurethane Dispersions eBooks, including some popular titles.

FAQs About Biobased Materials For Polyurethane Dispersions Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Biobased Materials For Polyurethane Dispersions is one of the best book in our library for free trial. We provide copy of Biobased Materials For Polyurethane Dispersions in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Biobased Materials For Polyurethane Dispersions. Where to download Biobased Materials For Polyurethane Dispersions online for free? Are you looking for Biobased Materials For Polyurethane Dispersions PDF? This is definitely going to save you time and cash in something you should think about.
