- 1 A vendor neutral architecture for building any blockchain applications
- 2 A detailed introduction to

Ethereum and its core components We will set up a local instance of Ethereum and build end to end application on Ethereum blockchain using a hands on approach At the end we would cover topics around extension to Ethereum blockchain integration with the external world and the future of smart contracts 3 A detailed introduction to IBM Hyperledger Fabric and its core components We would cover the enterprise capabilities provided by Fabric 1 0 At the end we would set up a local instance of Fabric and build an end to end application on Fabric using a hands on approach
