Government Accountability Office,David A. Powner,2014 Cloud computing is a relatively new process for acquiring and delivering computing services via information technology IT networks Specifically it is a means for enabling on demand access to shared and scalable pools of computing resources with the goal of minimizing management effort and service provider interaction To encourage federal agencies to pursue the potential efficiencies associated with cloud computing the Office of Management and Budget OMB issued a Cloud First policy in 2011 that required agency Chief Information Officers to implement a cloud based service whenever there was a secure reliable and cost effective option GAO was asked to assess agencies progress in implementing cloud services GAO s objectives included assessing selected agencies progress in using such services and determining the extent to which the agencies have experienced cost savings GAO selected for review the

seven agencies that it reported on in 2012 in order to compare their progress since then in implementing cloud services the agencies were selected using the size of their IT budgets and experience in using cloud services GAO also analyzed agency cost savings and related documentation and interviewed agency and OMB officials GAO is recommending among other things that the seven agencies assess the IT investments identified in this report that have yet to be evaluated for suitability for cloud computing services    New Strategies in Cloud Computing Luc Lariviere,2020-04-07 Cloud computing enables on demand access to shared computing resources providing services more quickly and at a lower cost than having agencies maintain these resources themselves Chapter 1 discusses selected agencies progress in implementing cloud services the extent to which those agencies increased cloud service spending and achieved savings or cost avoidances and examples of agency reported cloud investments with notable benefits The Office of Management and Budget OMB has developed a new strategy to accelerate agency adoption of cloud based solutions Cloud Smart Chapter 2 reports on the strategy of successful cloud adoption security procurement and workforce The Department of Defense DoD has entered the modern age of warfighting where the battlefield exists as much in the digital world as it does in the physical Cloud is a fundamental component of the global infrastructure that will empower the warfighter with data and is critical to maintaining our military s technological advantage as reported in chapter 3 Chapter 4 discusses accelerated adoption of the Joint Enterprise Defense Infrastructure JEDI Cloud program In the Clarifying Lawful Overseas Use of Data CLOUD Act Congress enacted one of the first major changes in years to U S law governing cross border access to electronic communications held by private companies Chapter 5 reports on the major components of the CLOUD Act Chapter 6 discusses United States v Microsoft Corp as it pertains to the CLOUD Act    **The Contrasting Environments for Cloud Computing in the United States and Europe** Brock Rutter,2012 This thesis will first offer an explanation of what the cloud is and why it matters to us It will also detail some ways in which law can both alleviate and exacerbate problems in the cloud Subsequent sections will contrast regulation in the United States and Europe which were selected as examples because of the contrasts they offer A section on jurisdiction will outline the ways in which cloud providers can be subject to numerous regulatory regimes simultaneously This section should show how governance of the cloud has necessitated new and permissive theories for the exercise of jurisdiction what constraints there are derive instead from real world limitations on enforcement and providers decisions whether or not to operate in each jurisdiction Finally important reasons exist to retain the global nature of the cloud computing network even if equally valid reasons exist for allowing nations to make different policy decisions in areas affected by cloud computing A globally interoperative network need not mean conversion of substantive law nor undue restrictions on the locations of infrastructure    **Cloud Computing :.** United States.
