

# CHESS

The object of chess is to place the opponent's king piece in 'check'. This is when the piece is in direct threat of being taken by the opponent. Check can be interrupted by blocking the attack with another piece, or by moving the king piece to safety. When no moves can be made to protect the king, it is in 'checkmate' and the game is over.

The pieces in chess each have their own individual moves.

**PAWN** - Can only move one square forward per turn, except for their first when they can move two. They can capture other pieces diagonally to their front left and right.

**ROOK** - Can move any number of squares horizontally or vertically. It cannot jump over other pieces.

**KNIGHT** - Moves in an 'L' shape two squares horizontally, and then one square left or right. It is the only piece with the ability to jump over others.

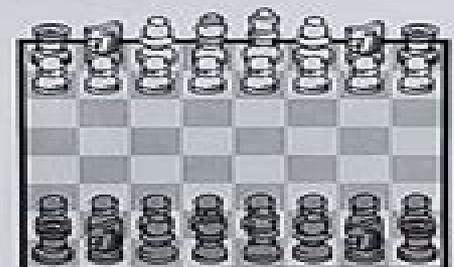

**BISHOP** - Can move any number of squares diagonally. It cannot jump over other pieces.

**KING** - Can move one square in any direction.

**QUEEN** - Can move any number of squares horizontally, vertically or diagonally. It cannot jump over other pieces.
