

Chapter 8

Infrastructure

Q. 1 Explain the term 'infrastructure'.

Answer:

Infrastructure is a basic supported structure which is built to provide various kinds of services in an economy. It includes roads, railways, sports, airports, dams, power stations, oil and gas pipelines, telecommunication facilities, and the educational system including schools and colleges in the country, the healthcare system including hospitals, the sanitary system including the drinking water facilities and the monetary system including banks insurance and other Financial Institutions.

Q. 2 Explain the two categories into which infrastructure is divided. How are both interdependent?

Answer:

The two categories into which infrastructure can be divided are – economic infrastructure and social infrastructure.

The economic infrastructure is related to energy, transportation, and communication. It helps in economic growth. The social infrastructure is related to education, health, and housing. It enhances the quality of standard of living of people and leads to the welfare of the economy.

The economic growth attained due to perfect economic infrastructure will not be sustainable if the social infrastructure is not properly developed.

The economic and social infrastructures are complementary to each other because the economic infrastructure supports the economy from inside and the social infrastructure from outside.

Q. 3 How do infrastructure facilities boost production?
