Hunza John H. Tobe, 1971

What do you know about Hunza Is it fact or fiction No Hunza is not a myth the author thought it was that's why he went there He was always a doubter He had to see it for himself before he would believe it So he went and he saw Yes it is true they are the healthiest and longest lived race of people so far discovered on Earth Hunza is one of the least populated countries because in that extensive region that constitutes Hunza live less than 30 000 people To confirm his first findings he

went back to Hunza and the surrounding area in 1961 then again in 1963 and he s going back again if the fates allow in 1971
The perplexing question to most people is Why are the people of Hunza the healthiest and longest lived people on earth That
is what everyone wants to know and why not Who can blame them They want to learn how they too can reach that wonderful
